Blemished skin is not a question of age or gender. Often the problems start during puberty and can continue into adulthood. Three causes of blemished skin are considered to be the tendency toward follicular hyperkeratosis, disorders in sebum production and excessive bacterial colonisation of the skin flora. There is also a difference between acne oleosa, which can arise from an oily, moist skin condition, and acne sicca, which doesn't produce enough sebum and is more typical of ageing skin.

OILY SKIN is the ideal skin care range for combating all signs of blemished, oily, acne-prone skin: Whether you have youthful or older blemished skin, isolated blemishes, the onset of acne, a shiny complexion, blackheads, enlarged pores or multiple signs – OILY SKIN has got you covered no matter what kind of blemished skin you have. From cleansing to care to special products, all blemished skin can find its individual care routine. Highly effective active ingredients such as fruit acids, salicylic acid, anti-sebum active ingredients and microsilver ensure a quick and visible improvement of the skin's appearance.

Tailor-made treatments are available at the salon to help your client fight blemished skin.

Regular home care is a must. That is why we have come up with a wide range of home care products.

OILY SKIN

- **First step in the OILY SKIN skincare system for oily, blemished skin**
- **Creamy consistency**
- **For clear and pure skin**
- **Pore-refining**

Application at home

For thorough skin cleansing, generously apply AHA + BHA Cleanser to the face, neck and neckline and gently massage in. Remove any residue with compresses at a comfortable temperature.

Heads up:

pH value of 4.2

Do not leave on the skin for more than 3-5 minutes.

Do not apply to eyes or mucous membranes.

☰ AHA + BHA Cleanser

CLEANING EMULSION WITH AHA & BHA

AHA + BHA Cleanser is a cleansing milk for oily, blemish-prone skin. The formula contains fruit acids to thoroughly remove dirt, make-up and dead skin cells from the skin. It leaves the skin feeling pleasantly clean and supple.

AHA + BHA Cleanser contains a combination of the alpha hydroxy acids glycolic, malic, citric and tartaric acid and the beta hydroxy acid salicylic acid. The fruit acids or AHAs dissolve dead skin cells and open up clogged pores. This allows the sebum to drain more easily. This counteracts the formation of blemishes and pimples. Salicylic acid can also loosen excessive cornification but also has an antimicrobial and anti-inflammatory effect.

With regular use, we can improve the texture of the skin significantly.

We recommend AHA + BHA Cleanser for acne oleosa especially.

💧 ACTIVE INGREDIENTS

Mixture of fruit acids identical to those found in nature:

- **AHA fruit acid complex:** Consisting of glycolic, malic, citric and tartaric acids, the formula gently and safely dissolves excess cornification of the skin (keratolytic effect) and stimulates cell proliferation
- **BHA salicylic acid:** Salicylic acid is a naturally occurring active ingredient with antimicrobial and anti-inflammatory properties. In addition, excessive cornification is loosened

OILY SKIN

- **First step in the OILY SKIN skincare system for blemished, rather dry skin**
- **Cleanses thoroughly and yet is gentle on the skin**
- **Prevents inflammation, pimples and blackheads**
- **Leaves skin feeling clean, fresh and soft**
- **Leaves the skin ideally prepared for subsequent skincare products**

☰ Purifying Cleansing Gel

MILD CLEANSING GEL

Purifying Cleansing Gel cleanses blemished skin thoroughly and gently without drying it out. The fine foam removes dirt and excess sebum to reduce the skin's shiny complexion. At the same time, the moisture content of the skin is preserved.

Purifying Cleansing Gel is particularly suitable for mature, rather dry skin prone to blemishes, as in the case of so-called acne sicca where there is a severe lack of moisture in addition to a cornification disorder. Thanks to mild plant-based surfactants, the skin is cleansed particularly gently. Panthenol provides additional moisture while counteracting mild redness and inflammation.

The result? The skin feels refreshed, clean and more supple. The natural skin protection is strengthened. Inflammation, pimples and blackheads are prevented.

Application at home

Gently spread the Purifying Cleansing Gel over the skin on the face, neck and décolleté with damp hands. Rinse thoroughly. Treat with Purifying Tonic.

***Tip:** If the skin is free of inflammation, a face brush is best suited for spreading the cleansing gel.*

💧 ACTIVE INGREDIENTS

- **Decyl glucoside (sugar surfactant):** Vegetable-based cleansing agent for gentle cleansing of the skin
- **Panthenol:** Provitamin B5. Panthenol has moisturising and anti-inflammatory properties. This helps alleviate redness. As well as this, panthenol has soothing properties

OILY SKIN

- **Deeply cleanses the pores**
- **Regulates excess sebum production**
- **Provides moisture**
- **Repels impurities**
- **Leaves the skin ideally prepared for subsequent skincare**
- **Skin-friendly pH**
- **Alcohol-free**

Purifying Tonic

CLARIFYING PORE-REFINING TONIC

Purifying Tonic is the second step in the skincare routine for blemished, acne-prone skin. The mild, alcohol-free facial toner removes the last remnants of the cleansing product and make-up, as well as limescale residues that can build up from using tap water. The skin is clarified, gently mattified and moisturised.

The innovative Equal Refining Complex of oleanolic acid and Enantia chlorantha bark extract is proven to refine pores and normalise excess sebum production in oily skin. Glycerine moisturises the skin and reduces any feeling of tension.

Purifying Tonic is the ideal preparation for follow-up care. In the long term, the texture of the skin can be refined significantly.

Application at home

Pour out the Purifying Tonic onto a cotton pad and gently sweep over the face and neck. Apply after each cleansing with Purifying Cleansing Gel.

ACTIVE INGREDIENTS

- **Equal-Refining Complex:** The combination of oleanolic acid and the extract from the bark of Enantia Chlorantha slows down sebocyte growth. The sebaceous glands are put into a dormant state, reducing greasy shine by -21.7% and pore size by -16% after 28 days
- **Glycerine:** Conditioner for the skin. Glycerine has a hygroscopic effect and binds water. This increases the moisture content of the skin

- **Creates an even, fine complexion**
- **Stimulates cellular renewal**
- **Removes excess horny flakes**
- **Refines pores**
- **Provides a natural glow to the skin**
- **Reduces inflammation**

Application at home

AHA + BHA Exfoliator should preferably be used after cleansing the skin in the evening. To do this, spread the preparation generously over the face and neck 2-3 times per week, avoiding the eye area. Leave-in time 5-15 minutes. Massage in briefly using damp fingertips and remove excess with a mask sponge and plenty of lukewarm water. Then follow up with the night cream.

Tip: The concentration of 20% AHA & BHA also allows an effective but safe home treatment.

Heads up:

AHA + BHA Exfoliator 20%: pH value of 4.2

AHA + BHA Exfoliator 30%: pH value of 3.6

Each time the face mask is used, this thins the epidermis and makes it sensitive to UV light. This is why it is important to ensure adequate UV protection and apply Face Guard Advanced throughout the day. Only then should you apply the care cream as usual.

AHA + BHA Exfoliator

AHA & BHA FRUIT ACID FACE MASK

AHA + BHA Exfoliator is a highly concentrated fruit acid face mask specifically developed for oily, blemished and acne-prone skin. The formula combines four fruit acids (AHA) with pure salicylic acid (BHA) to reliably remove dead skin cells and open up clogged pores. Thanks to the antibacterial effect of salicylic acid, inflammatory processes are reduced and blemishes are diminished at the same time.

However, AHA + BHA Exfoliator can do even more than that: by removing the uppermost horny layer, the skin renewal process is activated and the synthesis of collagen is stimulated. In the long term, wrinkles are visibly reduced, pores are refined, unevenness is smoothed out and age and pigment spots are diminished.

The fruit acid face mask is offered in two different concentrations. The professional-use product contains a total of 30% AHA & BHA while the general consumer product contains 20% AHA & BHA.

Due to the high concentration of 30% AHA & BHA, the professional-use product must be applied extremely carefully in the beauty booth.

ACTIVE INGREDIENTS

- **AHA Fruit Acid Complex:** Consisting of glycolic, malic, citric and tartaric acids, the formula gently and safely dissolves excess cornification of the skin (keratolytic effect), stimulates cell proliferation and improves skin structure
- **BHA salicylic acid:** Naturally occurring active ingredient with antimicrobial and anti-inflammatory effects; In addition, excessive cornification is loosened

JANSSEN COSMETICS

OILY SKIN

- Foams up easily with water
- Cleans intensively and gently
- Removes dead skin cells
- Refines the complexion
- Leaves the skin with a silky matte feel
- Improves absorption capacity of follow-up care

Enzyme Peeling Powder

GENTLE FACE MASK IN POWDER FORM

Enzyme Peeling Powder frees the skin intensively and gently from loose skin cells and excess sebum. The fine-grained powder foams up slightly with water and then gets to work with its keratolytic effect. Free from mechanical exfoliating particles, it is also suitable for sensitive, blemish-prone skin.

Enzyme Peeling Powder contains a keratolytically acting enzyme complex of lipases and proteases, which is activated by foaming with water. It ensures that the intercellular cement between the dead corneocytes sloughs off and the dead cells can be more easily removed.

The result? A visibly more even and noticeably smoother complexion. With regular application, cornification problems and the resulting blemishes can be reduced.

We recommend the gentle but extremely effective Enzyme Peeling Powder especially for acne sicca.

ACTIVE INGREDIENTS

- **Enzymes:** Lipases and proteases (subtilisin) embedded in maltodextrin, used for gentle enzymatic removal of corneocytes
- **Silica:** Has an absorbing and mattifying effect on the skin
- **Sodium cocoyl glycinate:** A natural surfactant made from glycine and fatty acids from coconut. Used for gentle face cleansing. Leaves the skin feeling silky and soft

Application at home

Foam up a tablespoon of powder with water and spread over the face and neck. Gently massage into the skin using circular motions for about five minutes. Then leave it on for 3 minutes. Finally remove it thoroughly with a small dampened sponge.

Caution: The powder particles may lump together and negatively impact dosage control if they come into contact with water.

JANSSEN COSMETICS

OILY SKIN

- Cleanses deep into the pores
- Excess sebum is absorbed
- Reduces inflammation
- Promotes a clear and silky matte complexion
- Reduces blemishes and prevents them from reoccurring

Application at home

Apply Intense Clearing Mask to cleansed skin. Avoid the eyes. Leave on for up to 20 minutes. Remove with warm moist compresses. Use approximately 1-2 times weekly, and more often locally for inflammation if necessary.

Tip: The mask dries itself. It is easier to remove if gently loosened with wet fingertips. Also ideal for locally treating the T-zone of those with combination skin.

Intense Clearing Mask

SPECIAL DEEP CLEANING MASK

Intense Clearing Mask is the ideal deep cleansing treatment for large-pored, blemished and oily skin. It also soothes irritations and prevents skin blemishes, visibly improving the skin's appearance.

An innovative active ingredient complex of oleanolic acid and extract from the bark of *Enantia chlorantha* has been proven to refine pores and regulate excess sebum production. In addition, kaolin absorbs excess sebum and therefore reduces annoying skin shininess. Aloe vera and bisabolol soothe the skin and counteract inflammation.

The result? Leaves the skin looking perfectly cleansed and gently matted.

ACTIVE INGREDIENTS

- **Equal-Refining Complex:** The combination of oleanolic acid and the extract from the bark of *Enantia Chlorantha* slows down sebocyte growth. The sebaceous glands are put into a dormant state, reducing greasy shine by -21.7 % and pore size by -16 % after 28 days
- **Kaolin:** White China clay; very fine-grained, strong sebum-absorbing effect, purifying and mattifying
- **Aloe vera extract:** Soothing, purifying, moisturising
- **Bisabolol:** Reduces inflammation
- **Menthol:** Provides a cooling, refreshing effect on the skin
- **Glycerine:** Conditioner for the skin. Glycerine has a hygroscopic effect and binds water. This increases the moisture content of the skin

- **Skin blemishes are targeted and prevented**
- **Loosens excess skin flakes**
- **Loosens fixed comedones until they are completely removed**
- **Antibacterial and anti-inflammatory**
- **Moisturising**
- **Soothing**

Purifying BHA Serum

CLARIFYING SERUM FOR BLEMISHED SKIN

Purifying BHA Serum is a highly effective active ingredient concentrate for local application and targeted combating of skin blemishes. The lightweight formula contains salicylic acid to loosen superficial skin flakes, soften comedones and reduce inflammation. At the same time, the innovative Equal Refining Complex made of Enantia chlorantha and oleanolic acid reduces the shine of the skin and refines the pores. A sugar-based hydration booster in combination with glycerine significantly increases the moisture content of the skin. Aloe vera soothes skin while hyaluronic acid plumps fine lines of dryness.

Ideally, the serum is combined with the Light Mattifying Cream or Regulating Retinol Cream to significantly improve the complexion of blemished skin in no time at all.

Application at home

Apply locally if needed, i.e. directly to oily skin areas and existing or emerging skin blemishes, massage in lightly and leave on for a few minutes. Then use Light Mattifying Cream or Regulating Retinol Cream for further care.

Heads up:

pH value of 4.8

ACTIVE INGREDIENTS

- **Equal-Refining Complex:** The combination of oleanolic acid and the extract from the bark of Enantia Chlorantha slows down sebocyte growth. The sebaceous glands are put into a dormant state, reducing greasy shine by -21.7 % and pore size by -16 % after 28 days
- **Salicylic acid:** Naturally occurring active ingredient with antimicrobial and anti-inflammatory effects; loosens superficial skin flakes, softens comedones (keratolytic)
- **Sugar-based moisture booster:** Intensively moisturises; strengthens the skin barrier, reduces wrinkles caused by dryness and skin flaking
- **Aloe vera extract:** Rich in polysaccharides, enzymes, essential fatty acids, vitamins, minerals and many other active substances; moisturises and soothes
- **Hyaluronic acid (long-chain):** Forms a water-binding film on the skin surface and, protecting the skin from drying out. Fills out fine lines and wrinkles

JANSSEN COSMETICS

OILY SKIN

- Provides a fine, silky, matte complexion
- Reduces sebum flow and refines pores
- Soothes and prevents redness
- Moisturising
- Plumps up small lines and wrinkles

Application at home

Apply Light Mattifying Cream to cleansed skin in the morning and/or evening and gently massage in. Also suitable as a make-up base.

Light Mattifying Cream

LIGHT FACIAL CARE FOR BLEMISHED SKIN

Light Mattifying Cream is a light 24-hour care for oily, blemish-prone skin.

The skin type-specific formula contains active ingredients that clear the skin and give it a fine, silky, matte complexion. The innovative Equal Refining Complex of Enantia chlorantha and oleanolic acid is proven to reduce skin shininess and pore size. The combination of short-chain and long-chain hyaluronic acid ensures that the skin is optimally hydrated and small wrinkles caused by dryness appear smoothed. In addition, natural aloe vera has a calming and soothing effect. Shea butter provides suppleness and silica for an instant mattifying effect.

The result? The skin immediately appears matte and intensively moisturised. Day after day, the skin's appearance becomes cleaner, the pores are refined and sebum production is regulated.

ACTIVE INGREDIENTS

- **Equal-Refining Complex:** The combination of oleanolic acid and the extract from the bark of Enantia Chlorantha slows down sebocyte growth. The sebaceous glands are put into a dormant state, reducing greasy shine by -21.7 % and pore size by -16 % after 28 days
- **Hyaluronic acid (short and long chain):** Moisturising and retaining moisture; Dryness wrinkles are plumped up
- **Aloe vera extract:** Soothing, purifying, moisturising
- **Shea Butter:** Natural emollient; leaves the skin feeling soft and supple
- **Silica:** Absorbs, mattifies skin shortly after application, leaving skin feeling comfortable

- **Hydrates and strengthens the skin's barrier function**
- **Plumps up small lines and wrinkles**
- **Reduces sebum flow**
- **Refines pore structure**
- **Soothes and prevents redness**
- **Creates a youthful, silky, matte complexion**

Regulating Retinol Cream

RICH FACIAL CARE FOR BLEMISHED SKIN

Regulating Retinol Cream is a rich 24-hour care for mature, rather dry, blemish-prone skin.

The formula contains active ingredients that stimulate the skin renewal process, intensively moisturise and reduce blemishes. Stabilised retinol supports the skin's natural regeneration to reduce wrinkles, large pores and hyperpigmentation. The innovative Equal Refining Complex of Enantia chlorantha and oleanolic acid is proven to reduce skin shininess and pore size. The combination of short-chain and long-chain hyaluronic acid ensures that the skin is optimally hydrated and small wrinkles caused by dryness appear smoothed. Aloe vera also has a calming and soothing effect. Shea butter makes the skin supple.

The result? The skin is immediately and intensively moisturised and soothed. Day after day, the skin appears visibly refined. Blemishes and wrinkles are reduced.

Application at home

Apply Regulating Retinol Cream to cleansed skin in the morning and/or evening and gently massage in. Also suitable as a make-up base.

ACTIVE INGREDIENTS

- **Encapsulated retinol:** Stimulates collagen production and growth of fresh skin cells, helps restore youthful appearance, counteracts skin ageing; Anti-wrinkling effect; Increased stability and functionality compared to unencapsulated retinol, improved penetration into deeper skin layers
- **Equal-Refining Complex:** The combination of oleanolic acid and the extract from the bark of Enantia Chlorantha slows down sebocyte growth. The sebaceous glands are put into a dormant state, reducing greasy shine by -21.7 % and pore size by -16 % after 28 days
- **Hyaluronic acid (short and long chain):** Moisturising and retaining moisture; Dryness wrinkles are plumped up
- **Aloe vera extract:** Soothing, purifying, moisturising
- **Shea Butter:** Natural emollient; leaves the skin feeling soft and supple
- **Glycerine:** Provides moisture

JANSSEN COSMETICS

OILY SKIN

AHA Face Cream

SKIN RENEWING CREAM WITH FRUIT ACIDS

AHA Face Cream is a pleasantly light 24-hour care for oily, blemish-prone skin. This facial care that works round-the-clock loosens dead skin cells and activates natural skin renewal. Clogged pores, a frequent cause of blackheads and inflammatory processes, become free again. At the same time, the skin is better moisturised, appears fresher and smoother – an effect that is also interesting for mature skin prone to blemishes.

AHA Face Cream contains a fruit acid combination of glycolic acid, malic acid, tartaric acid and citric acid. Fruit acids act as a face mask. They inhibit the cohesion of corneocytes and support the natural renewal process of the skin. Excess skin flakes disappear and new cells can reach the surface unhindered. With regular use, the appearance of the skin can be significantly improved. Pores appear refined and the skin looks more even and softer.

The skin having a relatively low pH value is crucial for the fruit acids to be effective. AHA Face Cream has a pH value of approx. 4.4 with a fruit acid concentration of 10 % and is therefore optimally effective and well tolerated.

Application at home

Apply AHA Face Cream to cleansed skin, preferably in the evening, and massage in gently. Also suitable as a make-up base.

Tip: *Ideal in combination with Microsilver Serum. We recommend that you apply the products as follows:*

1. Microsilver Serum
2. AHA Face Cream

Heads up:

pH value of 4.4

Make sure you have sufficient UV protection during the day and apply Face Guard Advanced.

ACTIVE INGREDIENTS

- **Glycolic acid:** Occurs naturally in unripe grapes, sugar cane juice and sugar beet, among other things. Keratolytic effect
- **Malic acid:** Is found in unripe apples, gooseberries and other fruits; it is also slightly keratolytic in higher concentrations
- **Tartaric acid:** Tartaric acid and its salts are abundant in grape vines, grapes and the leaves of the vine; slightly keratolytic
- **Citric acid:** Is found in lemons, but also in many other fruits; keratolytic effect and works to brighten the skin in higher concentrations
- **Saccharide isomerate:** Moisturiser made from natural sugars. This forms a natural bond with the keratin (horn substance) of the skin and is therefore also called a "moisture magnet"

- Effectively combats existing pimples and blemishes
- Soothes irritated and stressed skin
- Refines pores
- Provides moisture
- Helps prevent new blemishes from forming
- Optimal balance of effect and tolerability
- No perfume
- Self-conserving by Microsilver

Microsilver Serum

ANTIBACTERIAL SERUM

Microsilver Serum has an optimal and long-lasting effect on pimples, blemishes and stress-related irritations.

The highly effective formula with 0.2 % microsilver and 3.5 % glycolic acid sustainably improves the skin's appearance and demonstrates an optimal balance between effect and tolerance.

Microsilver is proven to remove germs and microorganisms on the skin surface. This high-purity, highly porous silver produced by a mechanically complex process has an average particle size of 10 micrometres. Thanks to this special surface, Microsilver forms a repository on the skin from which antibacterial silver ions can be provided at any time. In this way, the restoration of a pure skin appearance is sustainably supported and accelerated. Due to its size, Microsilver does not penetrate into deeper skin layers.

Glycolic acid reduces excessive cornification. Existing blackheads are reduced faster, the formation of new blackheads is prevented.

The result? Microsilver Serum visibly improves the texture of the skin with regular use. Clinical studies evaluating the efficacy of Microsilver showed that at an application concentration of 0.2 %, a significant reduction in papules and pustules was achieved after 12 weeks of application.

Application at home

Apply Microsilver Serum morning and evening to cleansed skin and massage in softly. Avoid the eye area.

Tip: Ideal in combination with AHA Face Cream or Light Mattifying Cream. We recommend that you apply the products as follows:

1. Microsilver Serum
2. Morning: Light Mattifying Cream, Evening: AHA Face Cream.

Heads up:

pH value of 4.2

ACTIVE INGREDIENTS

- **Microsilver:** Pure natural silver, eliminates germs and microorganisms on the skin surface, stabilises the skin flora, has a skin-soothing effect. Microsilver works only on the surface of the skin and does not penetrate into deeper skin layers (no nanoparticles)
- **Glycolic acid:** Loosens cornification and refines skin pores
- **Glycerine:** Provides moisture
- **Allantoin:** Supports the skin's natural regenerative properties
- **D-Panthenol:** Provitamin B 5 (panthenol), stimulates cell regeneration and ensures better wound healing, promotes intact skin and increases the skin's moisture level
