

## **MVT Solutions Offers No Cost Fuel Efficiency Reports**

*New subscription service automatically provides detailed fuel efficiency test reports for MVT Certified Products®*

**Las Cruces, New Mexico – August 15, 2019** – MVT Solutions, a provider of breakthrough fuel economy testing and design and development services for the trucking industry, today announced that the test reports for its Certified Products are now available on a no-cost subscription basis.

“Receiving MVT Certified Certification is a mark of fuel efficiency excellence for a product and we feel strongly that the industry should have that information and the supporting test data in a timely manner and at no cost,” said Daryl Bear, lead engineer & COO at MVT Solutions. “In addition, the suppliers of the certified products have confidence that their results are being delivered by a trusted source to companies that are interested in their technologies.”

While MVT Solutions Certified Products’ Test Reports with the detailed test data on the latest fuel efficiency solutions for transportation companies are posted on the company’s web site, the new subscription service ensures results are delivered automatically as soon as they are available giving fleets the ability to have the most up-to-date information. Fleets currently relying on MVT results include Hirschbach Motor Lines, Penske Truck Leasing, Nussbaum Transportation, Mesilla Valley Transportation, C.R. England and Charger Logistics.

“We see a lot of products that claim fuel efficiency savings,” said Brad Pinchuk, CEO & president of Hirschbach Motor Lines, a 48-state truckload carrier with 2,000 tractors and 3,500 trailers. “With MVT Solutions we have reports and data that give us the confidence that we’re making better informed decisions. The information that MVT Solutions provides also lets us have more effective conversations with vendors.”

Certified fuel economy testing by MVT Solutions was developed from race car engineering and advanced vehicle test methods using sensors and recording systems that collect data on fuel consumption, aerodynamics, rolling resistance, driver behavior and other variables that affect fuel consumption. The data is analyzed using proprietary methods.

Subscribing can be done via the [MVT Solutions website](#) or by following the company on [LinkedIn](#).

MVT Solutions test reports for custom and developmental testing done for fleets or suppliers are released only with the permission of the company and are not part of the subscription service.

**About MVT Solutions**

MVT Solutions, a subsidiary of Mesilla Valley Transportation, provides fuel economy testing based on race car engineering. This high-tech testing methodology can obtain accuracy up to .25% and accounts for such variables as wind, driver behavior and duty cycle. With over 300 fuel economy tests conducted to date, the company's proven approach provides highly reliable and consistent data that enables trucking companies to make more informed choices and manufacturers to design and develop products backed by accurate fuel efficiency information that customers trust. MVT Solutions also provides consulting services to fleets looking to implement the right fuel-savings technologies for their operations. MVT Solutions was founded in 2016 and is based in Las Cruces, New Mexico.
