Overview

INDUSTRY
Education, PreK-12

PROFILE
Mesa County Valley School District 51 is based in Grand Junction, Colorado, and has a total student enrollment of 22,000 and staff of 3,000 across 46 sites.

CHALLENGE
Mesa County Valley School District 51 needed a way to organize a growing number of digital resources, manage their devices, and provide easy, flexible access for their 25,000+ users.

SOLUTION
After evaluating several SSO solutions, ClassLink provided the robust set of features that the district needed, including the ability to access school network files (My Files) from any location, and securely deliver class rosters to publishers (Roster Server). Mesa County Valley School District rebranded their Launchpad to D51 ClassLink Portal. The D51 ClassLink Portal is now home to all the district’s digital applications, online resources, and business tools. ClassLink has been easy to configure, deploy, and support.

Outcome
Today, the D51 ClassLink Portal has over 100 applications connected. Students and teachers have a streamlined sign-on process and a renewed excitement for technology in the classroom. From a district leadership perspective, insights from ClassLink Analytics allow admins to view and compare usage details for all their 46 campuses. The information in ClassLink Analytics has also helped in new and unexpected ways; from facilitating conversations between curriculum and IT leaders to informing decisions related to renewals and professional development. Empowering their users with the freedom to log in to D51 ClassLink Portal from any device and any location has improved efficiency and incited excitement for learning. So much that application usage nearly doubled YoY, proving that access is an imperative component of learner success.

“If you’re looking to increase classroom time and productivity, look at a solution like ClassLink.”

Randy Dalton, Mesa County Valley School District
