Olentangy Local Schools

Students and Teachers cheer as Olentangy switches from Campus EAI to ClassLink

The Challenge
Frustrations where high across the school system. The district had an existing single sign-on system but it was slow and unreliable. The current system bottlenecked at 1,000 users.

Choosing ClassLink
The district knew that it could not continue with its existing single sign-on system and began a search for something new. Several options were considered and a trial began.

ClassLink was installed in under an hour.
From the beginning, the ClassLink team was responsive and developed all the single sign-on links that were needed, with no extra cost.

The Outcome
Even during the trial, the district was able to get many times more students and teachers to use ClassLink than the existing SSO system the district was paying for. By the time the school district issued the purchase order to purchase ClassLink, there was more than 13x the number of daily logins.

Within days, ClassLink created all the needed SSO connectors the district needed, including PowerSchool, Schoology, BrainPOP, and Think Central.

“We chose ClassLink to solve a capacity issue with our previous SSO provider. They solved our capacity issue and increased our offering to students and staff. Our daily logins went up by over 1000%”

Robert Sexton, Olentangy Local Schools
