More time learning. Less time logging in.

Eliminating Barriers to Access
Single Sign-On Lessons Learned
From a Small District with a Big Voice
District Profile

- Andover Public Schools
- 20 minutes outside of Boston
- Located in Andover, MA
- Enrollment: 6,076 students over 10 schools
- Mix of Technology: Chromebooks 2-5, 1 to 1, BYOD at 6-12, iPads PreK – 1
- Teachers have MacBooks, switching to Windows
Initial Evaluation Criteria

BEFORE:
As digital resources expanded, students and teachers needed a central point of access. The district wanted to achieve the following:
1. Move away from the practice of bookmarking, for both security and efficiency reasons.
2. Create a catalog to showcase available resources rather than have users hunt them down.
3. Provide high schoolers with easy textbook access.
4. Provide all users with remote access.

POINTS TO CONSIDER:
• The district used Clever for Single Sign-On in the past, and were unsatisfied
• Received a word of mouth referral to look at ClassLink from fellow MA district
• Wanted a solution that was OneRoster® standards certified and ready to go.  
  More on IMS Global later.
• Selected ClassLink to be able to drive access from anywhere/any device, provide an intuitive and easy-to-use solution for all users, and add custom links to My Apps.
