Total Control

- A simple, intuitive control manages all aspects of indoor air comfort throughout your home

The air inside your home is essential for more than just comfort—it's essential for life. It impacts your health and your budget. That's why it's reassuring to know that with Aprilaire, you can be in complete control of your indoor air.

The Aprilaire Home Comfort Control™ goes beyond simple temperature management to include other equally important aspects of indoor air quality. Humidity, purity and freshness—all of these indoor air essentials come into perfect balance with one single, easy-to-operate control.

Used in place of your single-function thermostat, the Aprilaire Home Comfort Control does much more. It allows you to manage every aspect of your indoor air. That means you and your family can be more comfortable, more healthy and use energy resources more wisely.

If you're considering changes or improvements to your heating or cooling system, or if you're trying to create a healthier, more comfortable indoor environment, now would be the perfect time for the Aprilaire Home Comfort Control.

Control Humidity

When the humidity levels within your home aren't right, you notice it.

Too little humidity and everything seems dry and itchy. You may even see cracks in your woodwork and experience static shock. Too much humidity and you get that cold, clammy feeling. Unhealthy mold and mildew can also begin to appear.

Improper humidity aggravates cold and flu symptoms. It can also impact perceived temperature, causing you to overheat or overcool your home. That wastes valuable energy resources and costs you money. In fact, other than temperature, nothing affects your comfort more than humidity. And there's a fairly narrow range between too much and too little.

The Aprilaire Home Comfort Control continually manages humidity levels, providing optimum comfort year-round—in every room of your home. Not only will you feel that it's working, you'll see that it's working right on the control. And if you want to make adjustments to suit your personal preferences, you can do so with a simple touch.

- Automatically controls your Aprilaire humidification and dehumidification systems
- Provides confirmation that proper humidification is taking place

Control Air Purity

- Controls your Aprilaire air cleaning system, allowing you to manage air purity when you need it with Event-Based™ Air Cleaning
- Provides easy-to-read confirmation that your air is being cleaned based on your preferences

The air inside your home can be significantly more polluted than the air outside—especially in today's tighter, energy-efficient homes. That's because pollutants, including dust, pet dander, allergens and viruses, are trapped inside with nowhere to go. It's no wonder so many people suffer from frequent colds, or aggravated allergy and asthma symptoms.

The Aprilaire Home Comfort Control gives you the opportunity to clean the air in your home based on your own needs. If someone in your home is suffering from allergies, there's a setting to address it. If you're kicking up extra dust while vacuuming, there's a setting for that. It's called Event-Based Air Cleaning, and it's only available from Aprilaire.

With Aprilaire, you'll breathe easy knowing you're doing all you can to protect the comfort and health of your family.

Control Fresh Air

While today's tightly sealed homes are great for conserving energy, they can also trap odors and make the air inside feel stale and stuffy. Some of that trapped air can contain harmful contaminants, such as carbon monoxide, bacteria and viruses.

The Aprilaire Home Comfort Control helps you push out all that stagnant, harmful air and bring in fresh, comfortable and odor-free air. And because it integrates with your other indoor air quality solutions, the fresh air you bring into your home will be perfectly balanced—clean and humidified at a temperature that's just right.

It's like opening all the windows of your home with one single touch.

- Controls your Aprilaire ventilation system providing fresh air automatically or when it is needed
- Determines when fresh air is being provided and provides confirmation that it's working

Control Temperature

- Controls heating and cooling equipment with a simple, programmable temperature control to maintain comfort while saving energy
- Provides immediate comfort from the cold with the Heat Blast™ feature

In addition to keeping the air in your home perfectly humidified, clean and fresh, the Aprilaire Home Comfort Control helps you manage the most basic of indoor comfort considerations—the temperature.

With a simple-to-use touch screen, you can program your heating and cooling systems. By heating and cooling your home only at the times you need it most, you're not just controlling comfort, you're controlling energy usage and cost.

The Aprilaire Home Comfort Control is easier and more intuitive than most other thermostats, and by addressing all areas of indoor air comfort—not just temperature—it's the most effective way you can truly feel good inside.

Delivering comfort to homes and families like yours for more than 50 years.

Aprilaire has a full range of indoor air quality solutions that work together to make your home more healthy, comfortable and energy efficient. From whole-home air cleaners and humidity control to ventilation and zoned temperature solutions, we can help you make the most of your Aprilaire Home Comfort Control.

Ask your HVAC comfort consultant about our full range of industry-leading products that were designed to help you and your family feel good inside.
