

INDEX OVERVIEW

XOUT U.S. Large Cap Index (XOUTTR), applies a proprietary quantitative rule-based methodology to identify which of the 500 largest U.S. companies to exclude or "XOUT" from the Index. The Index approach benefits from what it does NOT hold, as opposed to what it owns.

ADVANTAGES OF XOUT U.S. LARGE CAP INDEX

X OUT DISRUPTERS: XOUT focuses on excluding disruptees, eliminating the bottom 250 names in the investable universe.

FORWARD FACING: Technological innovation is occurring at a rapid pace and is not priced into the market. XOUT seeks to identify the US companies that may be failing to adapt to such technological change.

ALTERNATIVE INDEXING: Passive investing buys everything in the market, even companies in long-term secular decline. Using a data driven methodology, XOUT developed a process to eliminate or simply, leave them *OUT*.
