

# Preparing for the Insight DevOps Engineering Interview

Rahil Bhatnagar, Program Director

# Interview Process

What are we looking for?

Background

DevOps

Monitoring Challenge

Insight Culture

Q&A

## 1. Understand:

- Technical thought process.
- Goals.

## 2. Determine:

- If DevOps is a great fit.
- If Insight is a great fit.
- If you're a great fit for Insight's process.

## 1. Keep it:

**concise, clear, and conversational.**

- Anything in your background is fair game - know it!
- STAR(T):** Situation, Task, Action, Results, (Takeaway)

## 1. Understand:

- What DevOps means.
- DevOps roles engineers fill (on a high level).

- Articulate clearly why you have a passion and hunger for DevOps.

## 1. Start with the big picture:

- What does the system do?

## 2. Dive into tool:

- What is AWS?
- How do you use Prometheus + Grafana?

- What can you do to improve this system?

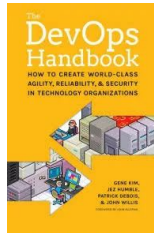

## 1. Read the whitepaper.

- Understand the timeline of Insight.

## 3. Understand the process at Insight.

- It is not a question of whether you are a good fit, it is a question of whether there is a good mutual fit.

This is the portion of the interview where its open to ask me or another program director anything on your mind.
