AC & DC SOURCES, REGENERATIVE LOADS, & POWER ANALYZERS

AC Frequency & Voltage Converters,
Programmable AC Sources & Electronic Loads
Bi-Polar DC Power w/Regenerative Electronic Loads.

High Performance Programmable AC & AC/DC
Power Sources with voltage/current control &
frequency conversion from 30 to 5,000 Hz.

[Newton's 4th](#)

Power Analyzers, Frequency Response Analyzers,
Vector Voltmeters, Phase Meters, Impedance
Analyzers, Power Amplifiers, Harmonics & Flicker.

High-Performance Programmable DC Power Supplies
Rack Mountable, 750 Watt to 90 kW
Precision High Voltage up to 300kV & up to 15 KW
NEW – Programmable Electronic Loads.

EMC / EMI / ESD / RF TEST SYSTEMS

World Leader in RF Solid State & Microwave Amplifiers,
Safety Instrumentation, & Turnkey Test Systems.

Bi-Polar, 4 Quadrant, Linear Amplifiers & Transformers
DC – 1MHz, .4kVA – 20kVA for
EMC test, industry, and R&D applications

modular rf

Tactical Booster Amplifiers, Rack Mount Amplifiers,
RF Modules & Systems for Military, Industrial, &
Aviation. Custom Capabilities

RF Test Equipment - Power Meters, USB Peak Power
Sensors, Power Sensors, RF voltmeters, Audio &
Modulation Analyzers/Meters.

Builds best-in-class Anechoic Chambers & Antenna
Test Ranges for Industrial applications, R&D, and
EMC Test.

Current and voltage – our passion

EMC Conducted Immunity Systems, EFT, Burst,
Surge, Ring Wave, & ESD Simulators. Magnetic Field
Test Systems.

Precision Positioners for EMC and OTA Testing, and
Antenna Measurements; Antennas for EMC Testing and
Distributed Antenna Systems

EMI generators, ESD Simulators, Measuring
Equipment and Related Solutions for Automotive,
Industrial, & Commercial.

TEST RACKS, WORKSTATIONS & CUSTOM ENCLOSURES

Electronic Equipment Racks and Consoles for a variety of markets including: [Test/Measurement](#), [Industrial](#), [DataCenters](#), [Energy](#), [Military/Aerospace](#)

TEST & MEASUREMENT INSTRUMENTATION

HIPOTRONICS

High Voltage Test Equipment - AC, DC Impulse systems for testing cables, transformers, and other distribution apparatus.

Boundary-Scan Test & In-System Programming solutions for design, manufacturing & field service. Indiana not covered by EQS.

Thermal, Infrared and Phosphorescent based fiber-optic Temperature Measurement solutions with isolation and complete immunity to RF, microwave and other harsh EMI & High Temperature Environments.

Electronic Noise Generation equipment and noise sources for the commercial, military, & telecommunications fields.

Test Instrumentation - Digital Oscilloscopes, Spectrum Analyzers, Waveform Generators, DMMs, Data Acquisition, Linear DC supplies & Electronic Loads

DATA ACQUISITION, DATA RECORDING, SWITCHING & SYSTEM PRODUCTS

Data Acquisition – High Performance Data Acquisition Instruments and supplies for the aerospace, defense, automotive, transportation, & industrial markets.

Bustec High Performance LXI Data Acquisition & Test Products. Leads the test and measurement industry in Density, Accuracy, and Throughput

Data Recorders - High Performance & Economical Data Acquisition Instruments & Systems

PXI and PC-Based test equipment and solutions that address a wide range of automated test, research, design and manufacturing applications.

The Largest Range of Switching and Simulation PXI, LXI Ethernet, PCI & HIL applications as well as a full range of supporting cables and connectors and both Hardware & Software solutions.

ZT-Series Oscilloscopes, Digitizers & Generators in PXI, VXI, & LXI Form Factors. Standalone Instruments, Integrated Subsystems or fully Integrated Component
