Adacel Secures New Simulator Contract With Georgia Aviation Technical College

New Contract Maintains Company's Lead in Air Traffic Control Simulation and Training

Orlando, FL (February 28, 2006) – Adacel, an industry leader in software integration, simulation development, and speech recognition technology, announced today it has signed a new agreement with the Georgia Aviation Technical College (GAVTC) to provide it's premier MaxSim tower simulator for the initial training and development of the next generation of US air traffic controllers.

GAVTC has received funding from the state of Georgia to expand their aviation department to include an air traffic control program.   As part of this expansion they have purchased a 270-degree MaxSim tower simulator with voice recognition and the latest functional capability. The GAVTC six-screen tower trainer is similar in size and function to the Tower Simulator System (TSS) in use by the USAF, FAA and USMC.   The contract is worth nearly $800 thousand (US).

"This new contract is extremely important to us." stated Fred Sheldon, Adacel North American CEO. "The selection by GAVTC re-confirms that Adacel's MaxSim represents the state-of-the-art in air traffic controller training systems. We are pleased to assist an innovative aviation college like GAVTC in establishing a new air traffic control program from the ground up. Our MaxSim system is ideal for all types of facilities and training. GAVTC and its students will benefit greatly from using it."

The selection of MaxSim by the college further consolidates Adacel's leadership in the US aviation college market, which includes 14 FAA Collegiate Training Initiative (CTI) colleges. Adacel has been chosen by nearly all of the CTI colleges that have already installed or selected systems.

GAVTC has established itself as one of the premier aviation training technical colleges in the United States.   Its ATC curriculum will include classroom, tower simulation, and real ATC tower training. GAVTC is located in Eastman, Georgia between Atlanta and Moody AFB. You can visit them at their website, www.gavtc.org, or call them at 1-866-374-6980.

About Adacel

Adacel is a global software technology and systems integration leader. The company is a leading developer of critical aviation (air traffic management), speech recognition, and defense simulation and security systems for government and business entities. Support services are available for all products including full-time, on site maintenance and operation of the systems.

Adacel's products can be found in more than 30 countries. The company is committed to innovative research and development and industry leading customer support.

Adacel was established in 1987 and listed on the ASX in 1998 (ASX: ADA). The Company's U.S. operations area headquartered in the I-4 Technology Corridor of Orlando, Florida. Adacel has offices in Washington, D.C., Montreal Canada, Melbourne, Australia and Manchester, United Kingdom.
