

STRATEGIC PROGRAM  
MANAGEMENT

# Translate Strategies into Results

Plan for strategic outcomes.  
Actively manage the strategic forecast.

EVOLUTIONIZER

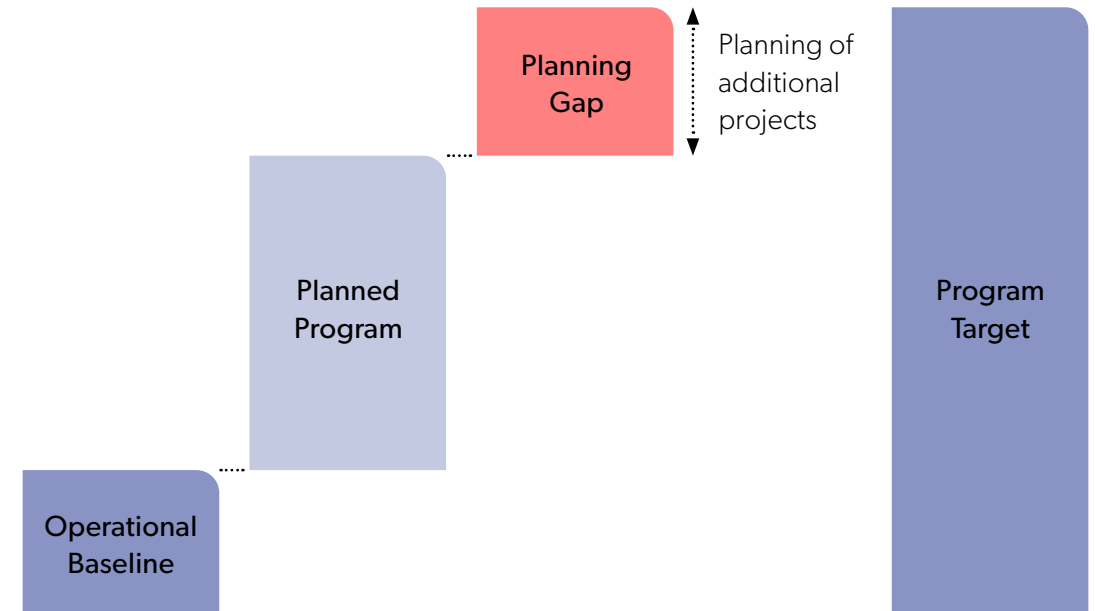

# Plan program with focus on strategic outcomes

Get a clear line of sight of the gap between the impact of all activities in a program and the program target.

- Make sure that the program reaches the defined target
- Identify and communicate the factors that are best to influence and have the strongest effect on the program outcome
- Make conscious decisions on resource prioritization to achieve maximum target impact

## Planning Room

Connect operational and strategic planning  
to identify program gap

# Face the reality of the planned activities in a program

- Break high-level program targets down into specific saving activities until they are fulfilled with a degree of confidence logic
- Alternatively, collect ideas for improvements activities and aggregate the impact to meet your target
- Recognize and change the planning gap by adding activities until the plan meets the program target

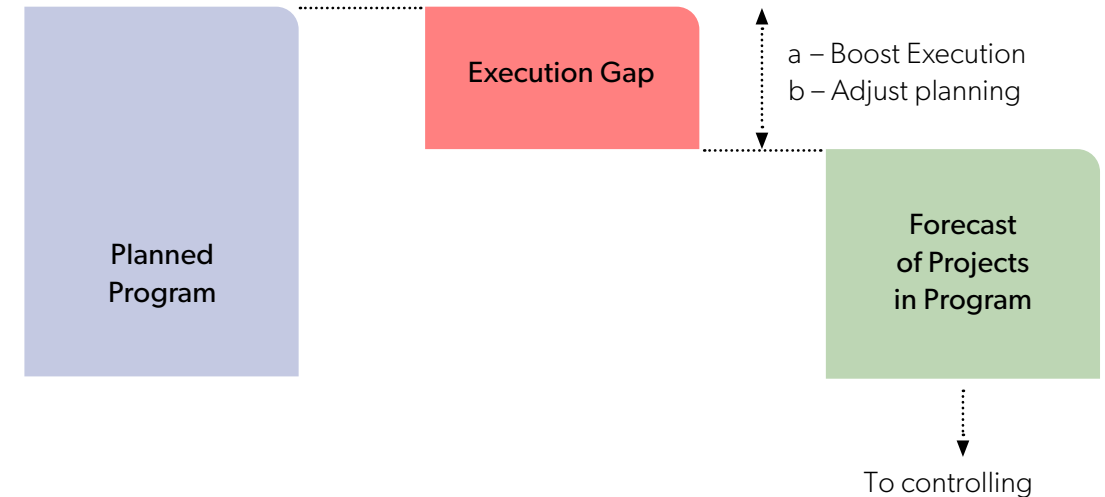

# Manage program with focus on strategic forecasting

Collect regular feedback about the forecasted impact of all activities in a program to identify the execution gap. Report the overall forecast to controlling.

- Recognize the need for boosting execution early
- Precise forecasting as a feedback for target/closed target process
- Learn for future projects with similar scope

## Reporting Room

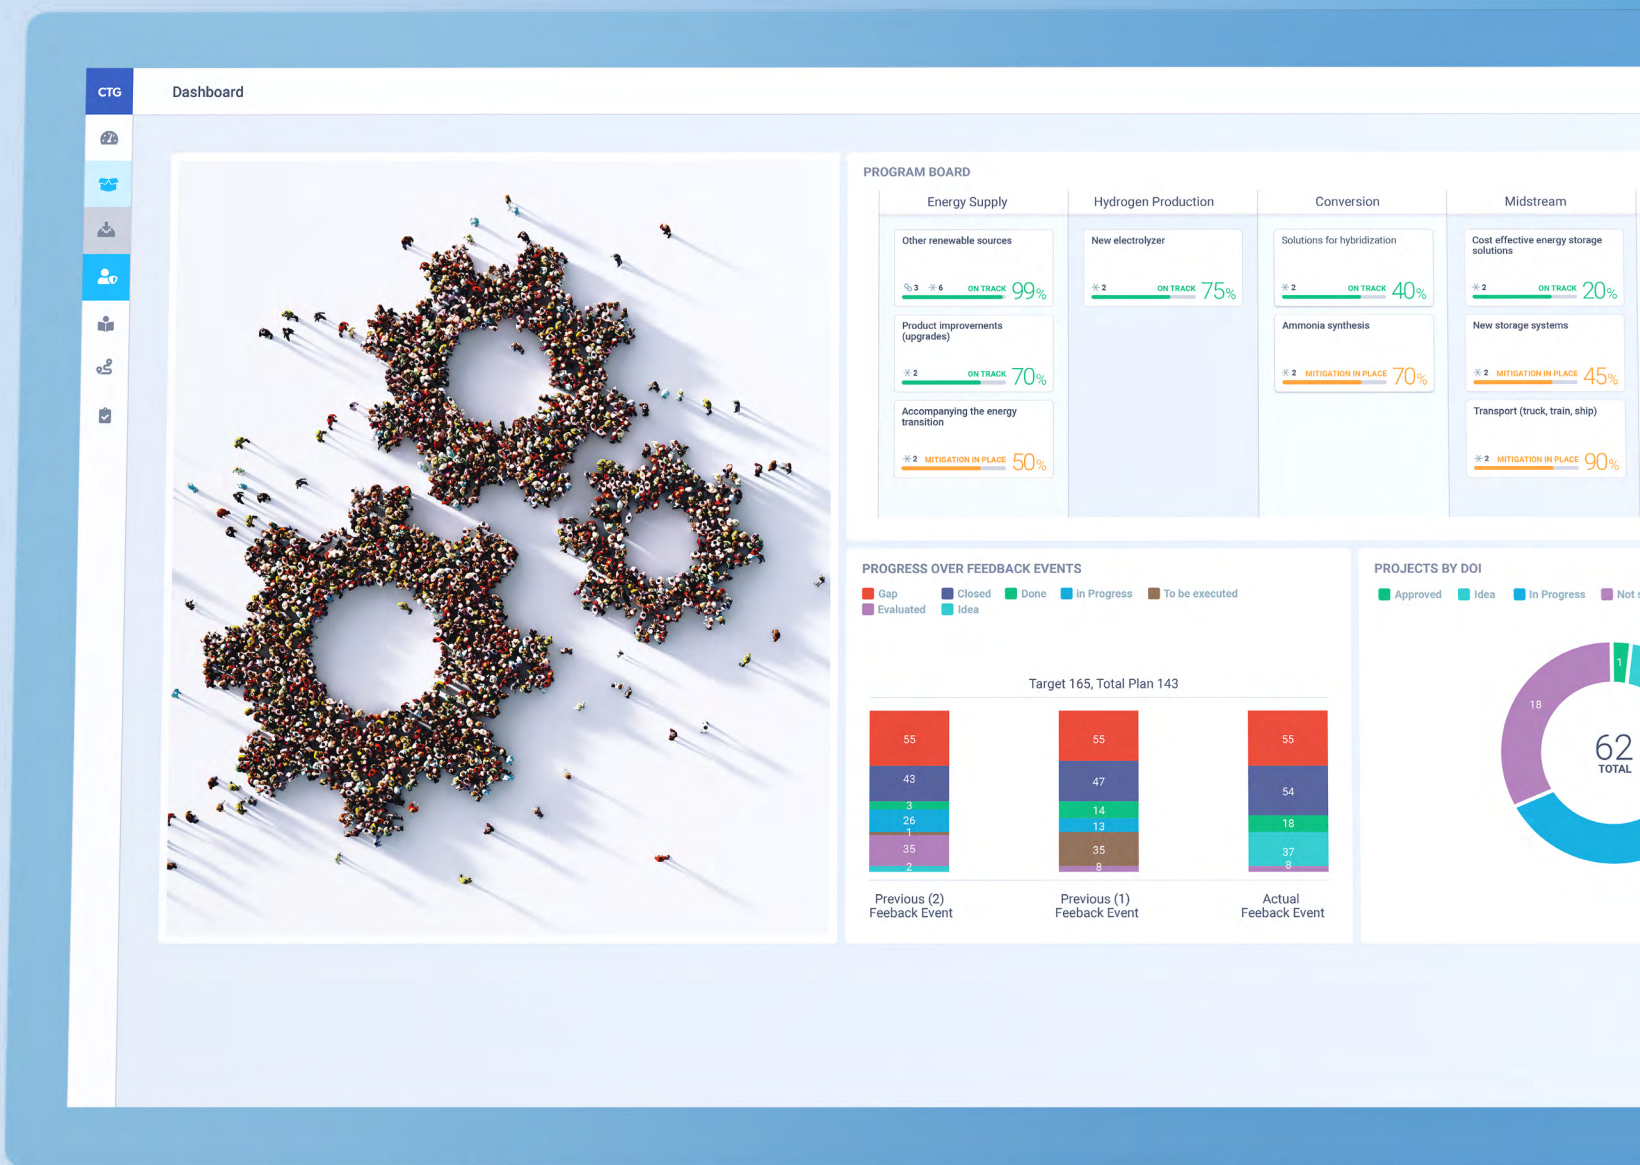

Reporting of program forecast and active management of execution gap

# Create transparency for all project members and generate stakeholder-specific reportings

- Establish dynamic and role-specific reporting of plan/forecast comparison, degree of implementation and program risks
- Seamless integration into customer's financial planning structure
- Generate custom-configured automated upload reports for key stakeholders at the click of a button
