PAI's Detroit Diesel DD15® Complete Engine Kit

Scraper Rings

Anti-Polish design scrapes carbon deposits which forms on the top land of the pistons

Anti-polish rings help to prevent the inner cylinder wall from wear and to keep lubricating oil consumption low.

Liners

Updated design Liners with anti-polish rings

Pistons

Improved all Steel Pistons with extended skirt design. PAI Pistons are designed for better performance during high temperature situations.

Piston Pins

Specially treated with PAI's High Performance Isotropic Superfinish. Lowers friction and extends performance.

Piston Rings

Latest design technology with long lasting coating to withstand wear and control oil consumption.

Head Gasket

3rd Generation OEM designed Head Gasket. Made in Germany.

Gasket Set

Complete head gasket sets to overhaul DD15 Engine.

Bearing Kits

Load side bearings are coated with PAI's High Performance polymer coatings for longer wear and better lubrication.

Valve Cover Kit

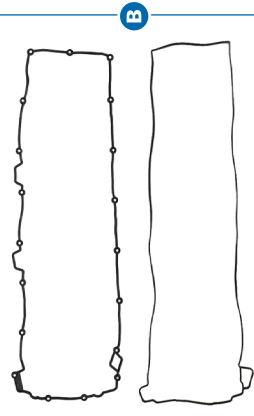

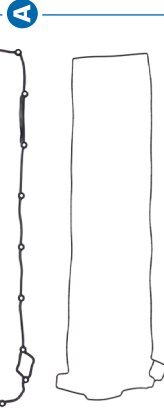

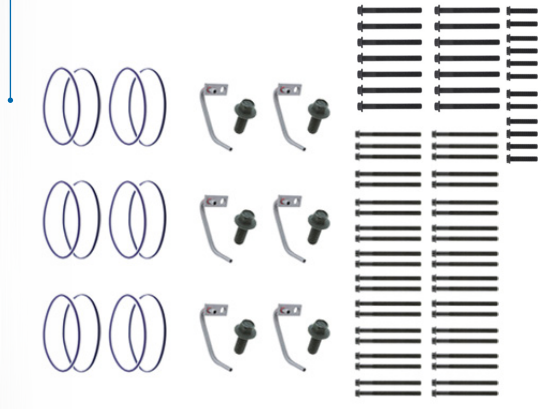

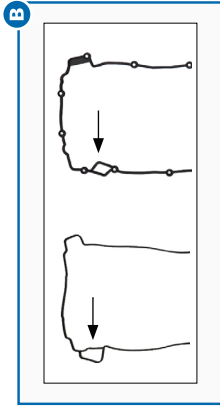

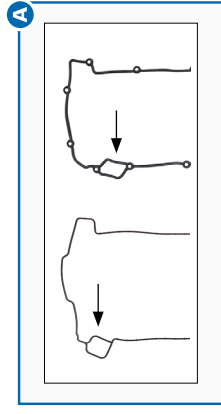

PAI engine kits includes both sets of valve cover gaskets for early and late model DD15 Engines

One Kit

One engine kit that covers multiple generations from 2012-2019

PAI kits include all critical parts such as cooling nozzles, head bolts, and other critical components.
