RE: Corona Virus cleaning procedure

March 17, 2020

In this time of "Social Distancing," Coldren's Cleaning Crew wants to let you know that for the past two weeks, we have been cleaning your businesses with hospital grade disinfectant on all commonly touched surface areas such as counter tops, door knobs, microwave and refrigerator handles, key boards, and other touch screen areas.

These actions are to help you minimize yours' and your customer's risks of the Corona Virus (Covid-19). This is being done as our way to help provide the best possible service to you, our valued customer, and to keep everyone healthy and reduce the anxiety that is present due to these trying times. These extra precautions will continue until the dangers from this virus have passed.

Please feel free to contact us if you have any questions or concerns regarding our currently implemented new safety measures.

Stay safe and be healthy; wash your hands and keep the Faith.

David Coldren
