

GRASSROOTS EVENTS PROGRAM

Grassroots events help you tell your story and build a relationship with your elected officials. Because it's more effective to show-and-tell rather than simply tell, our staff organizes grassroots events for our member companies with Members of Congress, elected officials and industry stakeholders.

This program was established to encourage visits by key decision makers to NRC and REMSA member facilities and construction project sites.

Benefits:

- Gives Members of Congress firsthand knowledge of the rail industry, and demonstrates how rail contractors and suppliers are positively impacting the industry and economy
- Positive publicity for the member company, a good working relationship with the company's Representative or Senator
- Strong contact for NRC & REMSA to utilize when advocating for issues on behalf of our industry on Capitol Hill

These grassroots visits are coordinated and executed by NRC and REMSA staff with little work required by the host member company.

We just need your project or facility to show off!
