

## **Junior Faculty Position in Health Econometrics**

### **The Division of Pharmacoepidemiology and Pharmacoeconomics of the Brigham and Women's Hospital**

The Division of Pharmacoepidemiology and Pharmacoeconomics (Chief: Professor Sebastian Schneeweiss) is building a program in Health Econometrics with applications to medication use and outcomes in several areas such as mental health and other clinical specialties to collaborate with a world-leading pharmacoepidemiology and health services research faculty. The faculty position will be located in the Division of Pharmacoepidemiology, Department of Medicine of Brigham and Women's Hospital.

We are a world-leading research division at Harvard Medical School that studies the use, effectiveness and safety of medical products in clinical practice. We have direct access to large amounts of up-to-date patient-level longitudinal data from electronic health records and insurance claims. In addition to the ongoing applied research activities, we have a portfolio of methods-focused projects funded by the FDA and NIH, many of which aim to improve estimation of causal treatment effects by making increasing use of unstructured and semi-structured data from electronic medical records.

An academic rank of Instructor or Assistant Professor at Harvard Medical School will be commensurate with experience, training and achievements. The successful candidate will collaborate and provide clinical informatics guidance in ongoing research projects, build their own research program, and engage in mentoring trainees.

Further information about our research programs can be found at [www.DrugEpi.org](http://www.DrugEpi.org).

Please send a c.v. and a cover letter describing your interest to Sebastian Schneeweiss, M.D., Sc.D., Chief of the Division of Pharmacoepidemiology and Pharmacoeconomics and Professor of Medicine at Harvard Medical School, and via e-mail at [lseton@bwh.harvard.edu](mailto:lseton@bwh.harvard.edu).

We are an equal opportunity employer, and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, pregnancy and pregnancy-related conditions or any other characteristic protected by law
