PIPE FABRICATION

AMERICAN MADE, PERFORMANCE BUILT

CAPABLE OF FULFILLING ANY DEMAND

With over 40 years of fabrication experience, Performance Contractors, Inc. is a leading industrial contractor serving the chemical, power, refining, offshore, and oil & gas industries. **Today, we are among the top 5 largest pipe fabricators in the U.S.** We have the capacity to produce up to 1MM feet of pipe a year; the equivalent of 189 miles. We operate four state-of-the-art pipe fabrication facilities along the Gulf Coast, as well as a centralized pipe support facility to meet any and all client needs in the most effective and timely manner possible. Due to such a large operation, we've developed a proprietary, in-depth tracking system that allows our clients to monitor order status from onset to delivery and installation. Our shops are built for efficiency, utilizing a rolling schedule to provide timely and cost-effective delivery.

PIPE FABRICATION FACILITIES

Baton Rouge, LA • Port Allen, LA • Mobile, AL • Rosharon, TX

300,000 total sq. ft. of fabrication facilities

Structural support shop in Mobile, AL

Exclusive alloy facility in Baton Rouge, LA

CAPABILITIES

- Over 1,800 + WPS
- Continuous 7-day fabrication shop coverage on rotating 4-day shifts
- ASME "U", ASME "S", and NBIC "R" Certified
- Supported by in-house trucking fleet

PRODUCTION

Detailing:

- Software: SpoolGen, AutoCad, iSketch
- In-house detailing group

Material Control:

- Software: Intergraph Smart Plant
- In-depth material reporting by spool for production and scheduling

Tracking:

- Software: Spool Tracking System (STS)
- Real time spool tracking per barcode
- QC Data is also tied to the barcode throughout the fabrication process with the ability to track down to the IWP level

QUALITY

- In-house NDE procedures, including X-Ray (RT), Ultrasonic Testing (UT), Mag Particle Testing (MT), Liquid Penetrant Testing (PT), Hardness Testing (BHN), Electric Resistance Heat Treatment (Local PWHT), Hydro Testing, and Positive Material Identification (PMI)
- 100% Visual Testing (VT) performed at multiple stages and hold points throughout the fabrication process to ensure maximum confidence in constructability
- Daily shop quality audits and weekly corporate quality audits to track for trends and proactively manage work
