FOR IMMEDIATE RELEASE

Adacel Honored for Technology Advances In Air Traffic and Security Simulation

Software Developer and System Integrator Wins Regional Innovation Award

ORLANDO, Fla. (September 24, 2005) – Adacel, a global leader in simulation software, integration and training, announced today that the Company has been awarded the 2005 *William C. Schwartz Industry Innovation Award*.

The honor was given by the Metro Orlando Economic Development Commission (EDC), and is part of the EDC's ongoing commitment to recognizing emerging and established companies that deliver cutting-edge products and services. The Company was the recipient for the City of Orlando.

"This is a tremendous honor for Adacel," said Adacel North American CEO Fred Sheldon. "To be recognized as an innovator in Central Florida, with its rich environment of technology-progressive companies is something that each member of the Adacel team can take great pride in. Adacel is continuously searching for ways to be better, and this is terrific recognition of that effort. We have built our reputation as a company that thinks beyond what is possible today, so that the future can be more secure, and we are pleased to be a positive business contributor to the central Florida community."

Adacel was recognized for its continued development of integrated software, simulation, and speech recognition technology. These various technologies support Adacel's pioneering air traffic management solutions for the aviation community, and its command and control simulation system for security and defense installations.

The Company is among the world's leaders in air traffic management simulation technology, providing air traffic controllers worldwide with high-fidelity training solutions previously unknown to the industry. Adacel has won every air traffic control tower simulator contract in the U.S. for the past three years, and all but one internationally.

Recently, the company announced the signing of a contract to provide advanced security control room simulators to Sandia National Laboratories, in Albuquerque New Mexico. Adacel's Command and Control Security Simulator and Emergency Dispatch Communications Simulator will be used to provide operator training on the new generation of IP based security systems.

About Adacel

Adacel is a software technology and systems integration leader across the globe. The company is a leading developer of critical security, aviation (air traffic management), speech recognition, and defense simulation and security systems for government and private business entities.

Since its public listing in 1998, the company has generated nearly a \$100 million in revenues.

With a stringent commitment to customer support and extensive research and development, Adacel is recognized as a leader in simulation system integration and software development. Adacel's products can be found in more than 30 countries.

Adacel Systems was established in 1987 and listed on the ASX in 1998 (ASX: ADA). The Company's U.S. operations are headquartered in the *I-4 Technology Corridor* of Orlando, Florida. Adacel has offices in Washington, D.C., Montreal Canada, Melbourne, Australia and Manchester, United Kingdom.
