Brighton, Victoria 3186  
Australia  
t. +61 3 8530 7777  
f. +61 3 9596 2960

The following announcement is issued by the company for release to the market.

### **AIRBUS CONTRACT ADVANCES ADACEL'S MARKET DEVELOPMENT STRATEGY**

Adacel is taking its award-winning MaxSim technology into the aircraft flight simulation market through a contract with Airbus. Under the contract, Adacel MaxSim technology will be used to generate air traffic environments for research and development of cockpit and aircraft systems for Airbus aircraft, including the world's largest aircraft, the new A380.

The contract is a further step in Adacel's strategy to take its existing air traffic control simulation technology into closely associated aviation and defence markets. Adacel was last year awarded a contract to develop for the Joint Strike Fighter a speech-enabled cockpit control system based on the voice recognition system developed to automate Adacel's MaxSim air traffic control simulators.
