

For Immediate Release

Adacel to Supply ATC Simulator to Trinidad

Montreal, Canada, 3 March, 2014 - Adacel announced today that the Company has been subcontracted by Aeronav Group to supply an air traffic control (ATC) simulator for the Trinidad and Tobago Civil Aviation Authority (TTCAA).

Under terms of the contract Adacel will supply and install a MaxSim aerodrome/approach ATC simulator at the TTCAA Aviation Training Centre in Piarco, Trinidad. Adacel's simulator will be integrated into the extensive TTCAA ATC training program and will allow the region's air traffic controllers to have access to state-of-the art simulation technology. Students will benefit through exposure to control situations in simulated scenarios, which will promote the development of the essential skills to perform in accordance with the highest international standards.

Trinidad & Tobago Civil Aviation Authority Facility

"Trinidad plays an important role in the air traffic control network of the Caribbean and Adacel is proud to support its ATC training program with our advanced simulation technology,"
Seth Brown, CEO Adacel

Adacel's ATC simulation systems have proven to be very effective in developing higher proficiency and accelerating the learning process of controllers during their course of study and ongoing training. The simulators are designed to provide ATC students with realistic hands-on practice that reinforces learning, from the basics of phraseology and communications through the advanced skills required to be a competent controller.

About Adacel

Adacel is a leading developer of operational air traffic management systems, speech recognition applications and advanced ATC simulation and training solutions. The Company's products are widely used throughout Europe, North America, the Middle East and the Asia Pacific region. Adacel is regularly recognized as a top training and simulation company having received many prestigious awards in recent years. For more information about Adacel please visit www.Adacel.com.
