Brighton, Victoria 3186  
Australia  
t. +61 3 8530 7777  
f. +61 3 9596 2960

The following announcement is issued by the company for release to the market.

### **ADACEL RECEIVES A\$3 MILLION CONTRACT EXTENSION FROM LOCKHEED MARTIN**

Adacel will provide further software support to Lockheed Martin for the U.S. Federal Aviation Administration's Advanced Technologies and Oceanic Procedures (ATOP) program under a A\$3 million contract extension from Lockheed Martin.

The FAA's ATOP system will control air traffic throughout the U.S. oceanic airspace. Adacel supplied the core oceanic air traffic management automation software for the ATOP program, for which Lockheed Martin Transportation and Security Solutions serves as overall systems integrator.

The ATOP program will modernise the FAA's three Oceanic centres in Oakland (California), New York and Anchorage (Alaska) that control all air traffic in the US Oceanic airspace. ATOP will be the world's most advanced Oceanic system when fully implemented in early 2006.

This contract amendment further strengthens Adacel's relationship with Lockheed Martin, one of the world's largest suppliers of air traffic systems.
