ASX & Media Release Adacel Technologies Limited (ASX: ADA)

**Melbourne, 21 April
2015**

Adacel Acquires CSC Business

Adacel Technologies Limited (**Adacel** or the **Company**) has announced that it has entered into an agreement with Computer Sciences Corporation (**CSC**) to acquire assets used in CSC's NexSim ATC simulator business.

Commercial terms of the agreement are confidential and not being released, but effective immediately Adacel has acquired from CSC the rights to CSC's NexSim product line including its source code and other intellectual property and associated support contracts.

Adacel has now assumed responsibility for the NexSim training systems and associated ongoing support services agreements. Adacel and CSC are working closely to ensure a seamless transition without interruption to existing customer programs.

Adacel's ATC simulators have proven to be very effective in developing higher proficiency and accelerating the learning process of controllers during their course of study and ongoing training. The Company is committed to designing advanced systems that provide ATC students with the realistic hands-on practice to reinforce learning the advanced skills required to be a competent controller. The combination of the newly acquired NexSim ATC business with the Company's existing aviation university customer base represents a leading market share position for the Company.

We are excited to expand our support of the FAA's Collegiate Training Initiative. Adacel has been a leading supplier to the program with our MaxSim ATC simulators and with this acquisition we now have systems at more than 95 percent of the schools in the CTI program."

Seth Brown, CEO Adacel
