

For Immediate Release

Adacel Featuring Advanced Products at CANSO World

Orlando, Florida, 26 February, 2014 - Adacel announced today that the Company will feature the latest technology developments in its advanced Aurora ATM system and elements of their ATC simulation and training products at the CANSO World ATM Congress. The annual conference and exhibition will take place March 4-6 in Madrid, Spain.

The World ATM Congress combines a large-scale exhibition and world-class conference to showcase the latest trends and developments in air traffic control. As such CANSO World provides an ideal venue for Adacel to exhibit the advanced capabilities of its Aurora ATM systems and ATC simulators.

“We are excited to showcase our products at the CANSO World ATM Congress again this year. This event provides an excellent opportunity to demonstrate the latest technology to ANSP and industry leaders.”

Jeff Tyrcha, Adacel VP Business Development and Marketing.

Adacel's Aurora ATM is an integrated system for oceanic, en route, terminal and tower operations that is fully compliant with Amendment 1 to PANS ATM, DOC 4444. The system features functionality to support NextGen and SESAR initiatives including 4D profile protection, automated conflict detection, monitoring & control by exception, separation based on individual aircraft performance and equipage, dynamic airspace allocation, controller pilot data link communications (CPDLC) and automatic dependent surveillance contract and broadcast (ADS-C and ADS-B).

Adacel is well known for the advanced features in their ATC simulators and repeatedly win awards for innovation in the modeling and simulation industry. At the CANSO event they will highlight elements of their training systems including aviation phraseology learning and their new LEXIX speech system.

Adacel, a Bronze Sponsor of the event again this year, will be located at stand #1105 and will perform product demonstrations routinely throughout the exhibition.

About Adacel

Adacel is a leading developer of operational air traffic management systems, speech recognition applications and advanced ATC simulation and training solutions. The Company's products are widely used throughout Europe, North America, the Middle East and the Asia Pacific region.
