Adacel Technologies Limited  
ABN 15 079 672 281  
240 Bay Street  
Brighton, Victoria 3186  
Australia  
t. +61 3 8530 7777  
f. +61 3 9596 2960

The following announcement is issued by the company for release to the market.

### **FURTHER AIRBUS CONTRACT CONTINUES ADACEL'S PUSH INTO ASSOCIATED MARKETS**

Adacel is to supply advanced simulation tools to Airbus for use in development and evaluation of flight components across a range of new and existing Airbus aircraft.

Under the latest order, which follows an earlier contract in 2005, Adacel will supply tactical military simulation tools, including Air-to-Air Refuelling scenarios, for the validation of tanker/ receiver procedures, cockpit Human Machine Interface operations and the testing of onboard avionics equipment.

The latest contract award continues a natural evolution of Adacel's products into the operational flight deck arena and helps progress the company's moves to take its air traffic control simulation technology into new closely associated markets.

Adacel's Air Traffic Generator will create simulated air traffic and Air-to-Air Refuelling environment, which will be integrated with multiple Airbus applications in development and evaluation programs. Adacel's simulation and speech recognition technology, with upgrades, is anticipated to support Airbus research and development efforts well into the future.
