ADACEL BUILDS ON ITS INTERNATIONAL SUCCESS WITH ITALIAN CONTRACT VALUED AT UP TO A\$15 MILLION

Adacel has been awarded a contract by Italy's air traffic authority, ENAV (Ente Nazionale de Assistenza Al Volo), for Air Traffic Control Tower simulators to be installed at ENAV's facility in Forli, Italy. The base contract is valued at approximately A\$8 million (approximately €5 million) with options totalling up to an additional A\$7 million (more than €4 million) for additional tower and radar simulators.

The latest order for multiple 270-degree MaxSim Tower simulators with voice recognition follows a tower simulator contract awarded to Adacel last year by ENAV and will significantly boost ENAV's training capabilities.

Adacel's Managing Director, Silvio Salom, said the contract would enhance Adacel's position as an international leader in ATC simulation. "Adacel is the leading provider of ATC Tower simulators and this contract will further build our position in the European market," Mr Salom said.

MaxSim simulators have been proven in civil and military ATC training and research throughout the world. The advanced features of Adacel's MaxSim simulators significantly assist controller training by creating a fully immersive tower environment. They feature speaker independent voice recognition, high fidelity 3D visuals and comprehensive weather and environmental sound effects.

About Adacel

Adacel Technologies Limited is a leading developer of advanced simulation and control systems for aviation and defence. Since its establishment in 1987, Adacel has built an international reputation for its products and services through a commitment to technological leadership and customer support. From advanced simulation to air traffic management and voice recognition systems, training and professional services, Adacel's products can be found in more than 30 countries. Adacel is listed on the ASX (Code: ADA) and can be found on the Web at www.adacel.com.
