

## For Immediate Release

### Adacel to Demo Advanced ATM Solutions in Curacao

**Orlando, Florida (June 13 , 2013)** - Adacel announced today that the Company will demonstrate elements of its Aurora ATM system and ATC Unified Training Solution while participating at the CANSO Latin America & Caribbean Conference (LAC) as well as the CANSO Global ATM Summit and 17<sup>th</sup> Annual General Meeting all taking place in Willemstad, Curacao.

The back-to-back CANSO events will gather air navigation service providers and industry partners to share and discuss information and developments aimed at improving navigation in the air and on the ground. The conference is centered on the theme "Transforming ATM Performance through Regional Cooperation and Collaboration". The event provides an ideal venue for Adacel to exhibit the advanced capabilities of its Aurora ATM systems and ATC simulators as a means to help harmonize ATM capabilities in the region.

*"We are excited to showcase our products at the CANSO events in Curacao. This venue promises to be an excellent opportunity to demonstrate the latest technology to global ANSP leaders."*

*Jeff Tyrcha, Adacel VP Business Development and Marketing.*

Adacel's Aurora ATM is an integrated system for oceanic, en route, terminal and tower operations that is compliant with Amendment 1 to PANS ATM, DOC 4444. The system features functionality to support NextGen and SESAR initiatives including 4D profile protection, automated conflict detection, monitoring & control by exception, separation based on individual aircraft performance and equipage, dynamic airspace allocation, controller pilot data link communications (CPDLC) and automatic dependent surveillance contract and broadcast (ADS-C and ADS-B).

Adacel is well known for the advanced features in their ATC simulators and repeatedly win awards for innovation in the modeling and simulation industry. The Company will highlight elements of their training systems at the CANSO events.

#### **About Adacel**

Adacel is a leading developer of operational air traffic management systems, speech recognition applications and advanced ATC simulation and training solutions. The Company's products are widely used throughout Europe, North America, the Middle East and Asia Pacific regions.
