## ASX Release

### Adacel Technologies Limited (ASX: ADA)

Melbourne, 21 May 2013

#### Lockheed Martin Procures Additional Adacel VAC Licenses

Adacel Technologies Limited (**Adacel** or the **Company**) is pleased to announce that the Lockheed Martin Corporation has procured an additional 32 licenses for Adacel's Voice Activated Cockpit system under Phase 5 of the F-35 Joint Strike Fighter (JSF) program.

Adacel's Voice Activated Cockpit system allows the pilot to issue voice commands to the aircraft and for the aircraft to respond to these commands. This system eliminates many manual operations ordinarily required by the pilot and thus reduces distractions, cockpit workload and allows the pilot to concentrate on achieving the flight mission.

Adacel's system is designed to operate effectively in high noise and high stress conditions that are characteristic of the demanding environment associated with in-flight aircraft operations. In addition to the F-35 JSF program, Adacel's Voice Activated Cockpit system is offered as an option on Alenia Aermacchi's M-346 Master aircraft and is being actively considered on other aircraft and vehicle platforms.
