

For Immediate Release

Adacel Awarded Support and Upgrade Contract for United States Army

Orlando, Florida (October 24, 2005) - Adacel, an industry leader in software integration, simulation development, and voice recognition technology, has received multiple orders to provide air traffic control simulation services for the United States Army. The agreements, with options, are valued at over \$1.3 million (USD).

These new agreements include a complete visual and voice upgrade for seven Enhanced Tower Operating Systems (ETOS) located at Fort Rucker, Alabama. Additionally, Adacel will provide on-site support and training, with options, through May 2008.

The Army is expected to use the newest **MaxSim®** simulator-related upgrades to enhance the training process at their state-of-the-art Air Traffic Control (ATC) training complex.

"Adacel is honored to have, once again, been selected to provide our industry-leading ATC simulation technology for the United States Army air traffic controller training and development program," states Fred Sheldon, Adacel's CEO. "We continue to enhance our comprehensive training and simulation tool which serves ATC personnel extremely well. This is a great and vital skills training program for a tremendous group of military professionals, and we are excited to be a part of the effort."

Adacel is the leading provider of air traffic control training simulators worldwide. Adacel's radar and visual control tower training products are used by: NASA, the U.S. Air Force, Army and Marine Corps, the Federal Aviation Administration as well as over thirty air navigation service providers around the world.

About Adacel MaxSim® Simulator

The Adacel **MaxSim®** range of air traffic simulators is the industry leading Air Traffic Control simulation product suite.

MaxSim® Tower and **MaxSim® Radar** are the premier simulation solutions that meet the pressing needs of our community. Capable of integrated tower and radar operations, **MaxSim® Tower** and **MaxSim® Radar** have the flexibility to be operated in standalone configurations, or in multiple independent scenarios.

MaxSim® products provide the functionality and features to address many areas, including: traffic flow studies, effective and efficient training of aviation personnel, airport sighting studies, gate-to-gate management, development of new airspace and airport management, techniques and procedures, disaster management planning and airport and aviation security studies.

About Adacel

Adacel is a software technology and systems integration leader across the globe. The company is a leading developer of critical security, aviation (air traffic management), speech recognition, and defense simulation and security systems for government and business entities. Multi-year support is available on all simulations as well as full-time, on site maintenance and operation of the systems.

Adacel's products can be found in more than 30 countries. The company is committed to innovative research and development and industry leading customer support.

Adacel was established in 1987 and listed on the ASX in 1998 (ASX: ADA). The Company's U.S. operations area headquartered in the ***I-4 Technology Corridor*** of Orlando, Florida. Adacel has offices in Washington, D.C., Montreal Canada, Melbourne, Australia and Manchester, United Kingdom.
