Top Simulation and Training Company Honors Go To Adacel

Orlando, Florida (3 December, 2013) - Adacel has announced that the company has been recognized by KMI Media Group and Military Training Technology (MT2) magazine as one of 2013's top simulation and training companies.

This marks the sixth consecutive year that Adacel has been named to the list, which has also included several past honors for leading the industry in innovation. This year Adacel has been honored with a **Red Ribbon** award for **Best Program**.

KMI Media Group and MT2 hold an annual competition to recognize companies that have made a significant impact in the military training industry throughout the current year. An impartial panel selects the winners from submissions from companies engaged in creating solutions across a diverse training area that includes among others serious gaming, visual systems, embedded training, simulation and database modeling. Special recognition in the form of "Ribbon" awards is bestowed on those companies who are deemed to have made the most significant contribution in one of the four categories Best Program, Innovation, Up-and-Coming, and Leading Military Sales.

Jeff Tyrcha accepting award from Brian O'Shea

"It is an honor to once again be selected among the best in the simulation and training industry. It is particularly gratifying to achieve Best Program recognition; an area we constantly strive to excel in."

Seth Brown, Adacel CEO

Adacel continues to be a leading innovator in the simulation, modeling and speech recognition fields. This year's Best Program award relates to Adacel's outstanding effort in spearheading the development of a one-of-a-kind simulator, in concert with Sandia National Laboratories, which represents the first integration of Human-In-The-Loop simulation into a comprehensive high security facility training program. The award, announced in September, was officially presented to Adacel at the Interservice/Industry Training, Simulation and Education Conference (I/ITSEC) taking place this week in Orlando, Florida.

About Adacel

Adacel is a leading developer of advanced simulation and training solutions, operational air traffic management systems, and speech recognition applications including integrating their speech technology with third party applications. Adacel is particularly well known in the ATC simulation field. The Company's products are widely used throughout Europe, North America, the Middle East and the

Asia Pacific region. Adacel is regularly recognized as a top training and simulation company having received many prestigious awards in recent years.
