

For Immediate Release

Adacel at 2004 I/ITSEC Convention

Orlando (December 14, 2004) – Adacel participated in support of the United States Air Force in the multi-service booth display at the 2004 annual Interservice/Industry Training, Simulation and Education Conference (I/ITSEC) held at the Orlando Florida Convention Center.

The U.S.A.F. invited Adacel to participate as partners in the annual I/ITSEC Conference where Adacel deployed a full sized Tower Simulation System (TSS) Air Traffic Control Tower training simulator to the Orlando Convention Center for the event. The 3D visual control tower simulator was demonstrated by Air Force air traffic controllers sent from various duty locations. Interest in the TSS system drew a continuous stream of convention participants including high level FAA and military attendees.

The Adacel MaxSim (TSS) control tower simulation trainer is unique in the industry due to speech recognition and control technology coupled with artificial intelligence, which enables control tower operator training at an unprecedented level of realism.

The Interservice / Industry Training, Simulation and Education Conference (I/ITSEC) is the largest convention of it's kind and draws worldwide attendance form the military training community and supporting industry.

About Adacel

Adacel is a leading developer of ATC simulation; speech recognition and control technology, operational air traffic management and software solutions for civil and military aviation as well as interactive simulation based eLearning systems. Adacel's products can be found in more than 30 countries and through its commitment to customer support and extensive research and development, Adacel is recognized as a leader in its chosen fields. Adacel Systems, Inc. is part of the Adacel group of companies, www.adacelsystems.com)
