

**For Immediate Release**

## **Adacel to Feature Support Services at I/ITSEC 2018**

**Orlando, Florida, November 19, 2018** – Adacel Systems Inc. (Adacel or the Company) has announced their plans for the 2018 Interservice/Industry Training, Simulation and Education Conference (I/ITSEC).

At this year's event Adacel will showcase their capabilities and experience with delivering first class training systems support tools and services. Adacel is a major player in the simulation and training field and has the established infrastructure to operate multi-service training system support centers. Adacel has also developed a comprehensive suite of tools designed to facilitate training delivery and optimize staffing levels.

Adacel will demonstrate aspects of their highly praised cloud based service request management system and their inventory and spares management systems designed to facilitate interactions with end-users and expedite support response. Adacel representatives will be prepared to discuss how Adacel recruits and manages onsite instructor and technical support personnel as well as the logistics behind their provision of first-rate support desk help and routine scheduled maintenance.

In addition Adacel will feature a variety of training tools and systems designed to streamline training delivery and record keeping and to reduce costs by optimizing instructor resources by enabling them to focus where they are needed most. Visitors can learn about Adacel's tools to easily convert an existing curriculum to a self-paced delivery platform and view methods for virtual instructor training delivery and remote multi-student monitoring and communication. Adacel also plans to demonstrate the application of a real-world operational system integrated within a simulated environment for training purposes using the Company's state-of-the-art Voice Activated Cockpit (VAC) system currently in use on the Aermacchi M-346 aircraft.

"Adacel has an excellent performance record on large-scale projects requiring extensive support services," said Gary Pearson, Adacel's CEO. "This makes us an ideal partner to team with on contracts requiring proven support service capabilities."

The 2018 I/ITSEC event will take place from 26-29 November at the Orange County Convention Center in Orlando, Florida. Adacel welcomes attendees to visit them at booth #641.
