## **FURTHER A\$5 MILLION CONTRACT EXTENSION FROM LOCKHEED MARTIN FOR US OCEANIC PROGRAM**

Adacel has received a further \$5 million contract extension to provide software support to Lockheed Martin for the U.S. Federal Aviation Administration's Advanced Technologies and Oceanic Procedures (ATOP) program.

The FAA's ATOP system is being established to modernise air traffic control throughout U.S. oceanic airspace. In June, the system became fully operational at the FAA's New York centre, responsible for controlling U.S. airspace in the North Atlantic.

The ATOP system is also being implemented at the FAA's Oakland (California) and Anchorage (Alaska) centres controlling the Pacific and Arctic regions.

Adacel supplied oceanic air traffic management automation software for the ATOP program, for which Lockheed Martin Transportation and Security Solutions serves as overall systems integrator.

When fully implemented, ATOP will be the world's most advanced oceanic system.

### **About Adacel**

Adacel Technologies Limited is a leading developer of advanced simulation and control systems for aviation and defence. Since its establishment in 1987, Adacel has built an international reputation for its products and services through a commitment to technological leadership and customer support. From advanced simulation to air traffic management and voice recognition systems, training and professional services, Adacel's products can be found in more than 30 countries.
