Australian Stock Exchange

The following announcement is issued by the company for release to the market.

ADACEL PROVIDES A\$2.1 MILLION OCEANIC ATM UPGRADE TO PORTUGAL

Adacel today announced a A\$2.1 million data link and radar upgrade to Nav Portugal's Oceanic Air Traffic Management system.

The latest upgrade follows the earlier completion of the enhancement of Nav Portugal's Oceanic Flight Data Processing and Visualization System's computer hardware, operating systems and real time controller displays.

The NAV Portugal ATM system, which utilizes Adacel's Aurora Oceanic ATM automation software, controls international air traffic in the Santa Maria Oceanic flight region of the North Atlantic. With this latest upgrade, Adacel provides software modifications to support Controller Pilot Data Link Communications and a gateway to display radar data to controllers from the recently installed radar in Santa Maria.
