ABOUT US

Program Management Solutions, LLC provides Healthcare I.T. Services, I.T. Acquisition Support and modernization, Management Consulting, Agile Software Development, Program and Administrative support and Staffing to the Federal Government, private, and non-profit sectors. Our business model is based on the following principles:

Innovation: We utilize the latest technology and implementation methodologies in order to deliver solutions that will reach the most demanding mission-critical objectives.

Flexibility: Our solutions are designed with enough flexibility to adjust for potential changes in objectives, deadlines, or resources.

Integrity: We uphold the highest level of moral and ethical principles from all levels of our company and make every effort to ensure that this is also followed by our partners.

Transparency: We feel that openly discussing strategies and potential "at risk" items with all stakeholders provides a more effective means of meeting all objectives.
