Stability & Storage:

alphamega³ is guaranteed to meet all product specifications when stored in the original, unopened container for up to 1 month at room temperature (+25°C), up to 12 months at refrigerated temperature (+4°C), and up to 24 months under frozen storage condition (-20°C) from the production date. For extended storage and for best sensory performance, frozen storage is recommended.

alphamega³ should be thawed completely and mixed before use. Avoid oil temperatures exceeding 60°C/ 140°F during the thawing process for best sensory performance.

As the material thaws, some phase separation may occur. This will not negatively impact the quality of the product, but it is important that the container contents are mixed well prior to use. When possible, use the entire contents of the container at one time. Unused portions should be blanketed with nitrogen and stored frozen.
