## Health and Safety Policy

The ownership and management of Prosperi Co. Ltd. is vitally committed to the health and safety of our employees and contractors. Our philosophy is that the well-being of our company depends on the health and safety of our workforce. To enable us to keep our quality and production at the highest levels, we must ensure that the health and safety of our employees and contractors is maintained at all times.

In order to achieve our health and safety performance objective, we shall:

- Design, implement, and continually evaluate and improve our health and safety programs, standards and work practices to meet or exceed all legislative and client requirements;
- Appoint, develop and hold accountable competent supervisors to be ultimately responsible for ensuring safe worksite conditions and for the well-being of our employees and contractors;
- Continually eliminate, control and mitigate actual and potential workplace hazards identified on our projects through sound risk analysis and follow-up;
- Provide and ensure adequate training for all employees and contractors performing work on behalf of our organization;
- Manage, inspect and maintain our equipment and worksites in order to provide a safe working environment to our employees and contractors; and
- Oblige all employees and contractors to assume responsibility for the health and safety of themselves and others by working safely and communicating and correcting unsafe acts or conditions.
