

RC 14

CONCENTRATED ALKALINE CLEANER AND DEGREASER

Cleaning products

ADVANTAGES OF RC 14

- ✓ Removes greases, oils, dirt and many other surface contaminants
- ✓ Also for removing tire marks
- ✓ Also as an additive for high pressure (steam) cleaning
- ✓ Concentrated formulation; can be diluted 1:20

Description

RC 14 is a concentrated, almost odorless cleaning agent. It is alkaline and non-flammable. RC 14 is used to remove greases, oils, dirt and many other surface contaminants from coated, mineral and steel surfaces.

Properties

- Can also be used for removing tire marks;
- Can be applied with a synthetic sponge, cloth or nylon brush/broom;
- Can also be used as an additive for high pressure (steam) cleaning.

Substrate

Clean the surface so that no excessive amounts of dirt, grease, oil or other impurities are present before applying RC 14.

Application instructions

Shake well before use. Apply RC 14 concentrated or diluted with a sponge, cloth, brush or broom. For normal cleaning a concentration of 3-5% is sufficient. Dilute the product with cold water. Rinse abundantly with clean water after use. When using a higher concentration than 5%, rinsing with hot water is necessary. A 2% solution is recommended as an additive for high pressure (steam) cleaning.

After cleaning, remove residual water and allow the surface to dry, as residual moisture or moisture trapped in the pores can cause premature failure of a coating system. Large surfaces or poor ventilation can result in a longer drying time, which means that a coating cannot be applied until later.

Temperature of air, substrate and material must be between 5°C and 35°C.

Consumption

Theoretical: 6-8 m²/liter, depending on many factors such as porosity and roughness of the substrate and material loss during application (see DIN 53220).

Technical characteristics

VOC-content	92 g/l
pH:	12

Security

Consult the most recent safety data sheet.

Cleaning of equipment

Immediately after use with warm water.

Storage / Shelf life

- Keep only in the original container in a cool, well-ventilated place. Opened containers should be carefully closed and stored upright to prevent leakage.
- 2 years in original packaging.

Packaging

10 liters (item no. 110600).
