

Our traditional Coating Pans are used in the pharmaceutical, confectionery and food industries.

With Skerman heritage dating back over 100 years, our **Winkworth** made Coating Pans have evolved and are trusted to perform for decades. Designed in 3D, our Coating Pans are optimised for your process need.

Our Skerman Coating Pans are economical and versatile and used extensively for products such as:

Tablets	Jelly beans	Rice and Pasta	Coconuts
Non pareils	Nuts	Raisins	Seeds
Mints	Dried fruits	Honeycomb	Mint imperials
Gobstoppers	Marinades	Liquorice	Sugar almonds

Winkworth Machinery Ltd

**Mixing all ways**

- W Precision engineered couplings ensure long life, robust and reliable performance.
- W Laboratory development models available for research and small batch production.

Features	Std	Option	Sizes
Hygienic design and construction	✓		Our range extends from our 406mm bench mounted laboratory unit to our 1700mm production coating pans.
Manufactured in stainless steel	✓		
Heavy duty base fitted with geared drive set to run at a fixed speed	✓		
Variable speed		●	
Semi-ellipsoidal, apple or pear shape		●	
Process air heater and dehumidifying systems		●	
Internal baffles, ribs, flights and domes		●	
Syrup preparation systems		●	
Spraying/atomising systems		●	
Product discharge by hatch door, plug valve or tilting		●	
Noise insulation and acoustic enclosures		●	
Ancillary equipment - pumps, raw materials handling, platforms and pipe work		●	
ATEX certified models		●	
Alternative materials of construction and surface finish available		●	
Full automation and control systems HMI/PLC		●	

At **Winkworth** we design each machine to suit your specific needs. The abbreviated option chart (above) is a guide to assist with developing the specification of your machine. To get your project started please call our sales team who will be delighted to help you.

**Winkworth** are application specialists in the complex and challenging world of mixing. Since 1924, years of experience, knowledge and client feedback have enabled **Winkworth** to design and manufacture bespoke mixing machinery for almost every mixing need.

**Winkworth's** current range includes the expertise and products originating from BPT Skerman and Premier Colloid Mills. For high shear in-line mixing we offer Ystral products and for low shear we have the Lindor "gentle touch" rotary drum blenders.

This complements the extensive range of proprietary mixer designs which are extensively used across all industries for mixing stiff gums, pastes, powders, liquids, etc, most of which are available at our Mixing Test Centre at our Basingstoke HQ.
