◦ SOMETHING FISHY'S GOING ON

Sustainability is all about ensuring we do not fish a species beyond the levels at which it can reproduce and maintain healthy stock levels. We must also ensure that fisheries are managed in such a way that the harvesting of wild fish does not upset the delicate balance of an oceans eco-system or damage the environment beyond what can repair itself naturally. Nobody wants to see a world without fish and there has been a huge focus on ensuring we are aware of the issues.

At Fizz & Fin we will not buy fish from any fishery that is not well controlled or managed and pledge to adapt our supply chain to ensure we are part of the global effort for change and well being for our fisheries and fish for the future.
