The Studio

The studio is rigged as in the drawing, in Central Park A and B at Clarion The Hub. Control rooms are located in the Frogner Park room right next door. This ensures a short distance from the studio to technical control, but also helps with infection control measures.

The studio is spacious so that participants do not have to sit close to each other even if they are in the same broadcast or meeting.

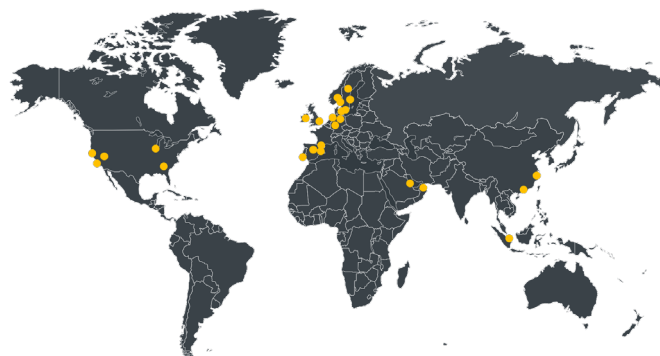

Worried about Corona infection?

We take Corona infection just as seriously as all normal HSE measures, and we have prepared a set of guidelines for our staff and projects based on current government advice. This is both to reduce the infection, but also to make staff and customers feel safe in our studio.

- All employees are healthy and symptom free. Employees suspected of infection and illness do not attend work.
- All employees follow guidelines for distance and greeting.
- The premises are thoroughly cleaned several times a day in accordance with the regulations and guidelines established by FHI.
- All surfaces are thoroughly washed between each transmission / meeting.
- Washbasin for visitors and access to disinfectant in all rooms.
- The studio can be controlled 100% remotely if needed.
- The studio can be adapted to individual needs. Contact us to discuss a solution.

Creative Technology operates worldwide
