

tecViz Congress

tecViz Congress includes tools for administrating participants, generating projection views and building speaker lists. It allows participants to interact during the meeting via votings and polls. Delegate use their tablets for reading documents, signing up for the speakers' list, writing bills and vote. Delegates can give their speeches through their device's camera, when the chairman gives them the word. Many hours and loads of paper are saved when using tecViz Congress.

PAPER FREE CONGRESS

Dramatically decreases paper need - all documents are viewed in the device.

REQUEST FOR SPEECH

Delegates sign up for the speech list with the click of a button.

SPEECH LIST

Following the democratic process, speakers' names will be listed orderly on the big screen.

VOTING

Secure digital votings.

DIGITAL PROTOCOL

Digital protocols are automatically generated in the system.

REMOTE SPEAKER

Live camera feed from the speaking delegate.
