

Overview information

Broadstep Pharmacy is a full-service long-term care pharmacy, providing customized compliance medication packaging and comprehensive Medication Therapy Management services.

Our professional staff provides exceptional and detailed care to each individual. As a part of an interdisciplinary team, our staff works closely with healthcare providers, care givers and individuals to coordinate appropriate, effective medication therapies.

Specialized packaging helps ensure that individuals are getting the right medication at the right time, and increases compliance with medication regimens. This improves medication adherence rates, which improves the lives of the individuals we serve. It can also lead to a reduction in hospitalizations.

Broadstep Pharmacy coordinates all aspects of delivery and shipping of medications to each program, ensuring that individuals have their medications when they need them.

As the medication experts on the healthcare team, our clinical pharmacists provide Medication Therapy Management (MTM) services to optimize therapeutic outcomes for each individual. This helps individuals get the best benefits from their drug therapy by actively managing drug therapy and identifying, preventing and resolving medication related problems.

MTM services include

(but are not limited to):

- Comprehensive Medication Reviews
- Patient Education
- Medication Adherence
- Disease State Management
- Screenings
- Medication Reconciliation
- Coordination Between Prescribers
- Immunization
- Tobacco Cessation Support
- Risk Assessment

Our goal with MTM is to make sure that each medication is right for each individual and his or her health conditions, and that the best possible outcomes from treatment are achieved.

Broadstep Pharmacy can also provide staff education on a variety of topics including

(but are not limited to):

- Medication Information
- Disease States (Diabetes, Heart Disease, Asthma, etc.)
- Medication Side Effects
- Device Techniques (Inhalers, Injection Techniques, Blood Glucose Testing)
- Lifestyle (Diet, Exercise)
