In dentistry, superior diagnostics create more efficient methodologies resulting in better decision making and, ultimately, a higher quality of care and long-term success. These diagnostics can actually *lower* costs to the patient by creating far more customized approaches to their dental care and create ideal treatment plans for long term success. This course will take the attendee into modern day diagnostics and demonstrate why the GP must be in control in how they integrate treatments with their specialists.

- 👉 Learn how to Read and Interpret CBCT scans, live
- 👉 Learn the Power this enhanced imaging brings your practice
 - Building Patient Trust
 - Increasing Revenue
 - Being a better diagnostician / Finding additional dentistry
 - Being a better referrer
