

INFECTION CONTROL

MEDIGENIC ESSENTIAL INFECTION-CONTROL KEYBOARD

The Medigenic Essential keyboard features a flat, flexible silicone surface that can be disinfected effectively in just ten seconds so that cleaning between dental patients is quick and easy. There is no need to disconnect the keyboard and move it to a sink or dishwasher for cleaning, and the silicone is impervious to any hospital-grade cleaner. A high quality scissor-style keyboard beneath the surface enables excellent tactile feedback for comfortable and efficient typing. A durable and cleanable keyboard is easier to use and more environmentally friendly when compared to the common practice of using disposable single-use plastic covers for each patient. Effective Infection Control has never been so easy.

ESSENTIAL KEYBOARD HIGHLIGHTS

Sanitize in Seconds

High-Speed Data Entry Capability

Disinfection without disconnection

Reduces Plastic Waste

Hypo-Allergenic
