

## INFECTION CONTROL

### MEDIGENIC WIRELESS INFECTION-CONTROL KEYBOARD AND MOUSE

The reputation of your dental practice depends on presenting customers with a sanitary environment where they feel safe. The efficiency of your practice depends on enabling your staff to perform the necessary room turnover tasks in as little time as possible, whether that is charting results or sanitizing the workspace. Medigenic keyboards are purpose-built to make cleaning easy and effective while also being comfortable to type with for rapid data entry. Featuring a flat, flexible silicone surface, they can be disinfected effectively in less than ten seconds. Their compact size fits on any tray or arm, and the cordless operation eliminates cable management challenges.

A durable and cleanable keyboard reduces the workload on staff as well as the impact to the planet, providing an economical alternative to disposable, single-use plastic covers. Effective infection control has never been so easy.

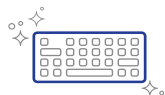

### WIRELESS KEYBOARD HIGHLIGHTS

Sanitize in Seconds

Low force scissor-style keys enable normal typing

Disinfection without disconnection

Compact size for dental arms and trays

Reduces Plastic Waste
