New Zealand's ageing population is steadily increasing creating a demand for trained community workers and caregivers.

“Currently there are around 725,000 people aged over 65. By 2036 there will be more than 1.2 million people 65 or older. Combined with the low birth rate, this means seniors will make up almost a quarter of the total population.”

- NZ Government Minister Tracey Martin (April 2018)

Course Descriptors

Aging and Palliative Care (15 credits)

- To introduce learners to the aging process and how it affects one's lifestyle and well-being over time. It covers the support requirements for palliative care as well as caring for the aged. The course covers signs of abuse and appropriate responses to these.

Professional and Cultural Aspects (16 credits)

- The course covers the cultural aspects of supporting Māori in a health or well-being environment, including Māori operating principles and values and the relationship between them. Professional and ethical behaviour is discussed, and learners are provided with an introduction to human anatomy and physiology.

Equipment and Safety Practices (19 credits)

- The aim of this course is for students to learn the correct procedures to be followed in using equipment to move people and how to assist people using assistive equipment. Workplace health and safety practices are covered. The holistic needs of the people requiring support are discussed together with how these might be met.

In the Workplace (22 credits)

- The aim of this course is for students to apply and develop the skills and knowledge they have acquired in a supervised workplace setting.

Diploma in Community Healthcare and Support (Level 7)

Duration 1 academic year
Campus West Auckland and Hamilton
Credits 120 credits

This programme provides students with the required skills and competencies for future work and career opportunities within the specialised field of the New Zealand healthcare industry. With a significant work placement at the end of the programme, graduates will be work ready and able to apply specialised and technical knowledge and skills in palliative and aged care, rehabilitation, health promotion and primary health care.

Entry Requirements

* Graduates of the Diploma in Community Health Care and Support (Level 7) may be eligible for entry into a variety of further tertiary programmes relating to this field of study - conditions apply.

Course Descriptors

Primary Health Care (15 credits)

- Students will explore the effects of socio-political and cultural determinants of health, competently applying this relevant knowledge to assist in the enhancement of health of individuals, whanau/family, organisations and communities.
- Students will examine the concepts of health promotion, health prevention and injury and primary health in relation to the health needs of the individual, whanau/families, organisations and communities.
- Students will examine governance structures, policy, legislation and fiscal influences on health care services in Aotearoa/New Zealand. Students will critique Ministry of Health strategies, guidelines and initiatives that impact on individual groups within society.
- Students will use analytical and inquiry processes to further their development as a community and/or organisational health promotion professionals.

Rehabilitation (15 Credits)

- In this course, students will develop the skills required for worker's compensation injury management and return to work programmes in a variety of industries. Students will learn how to plan, design, implement and evaluate injury management systems and worker's compensation processes that consider cultural perspectives and determinants of health.

Professional Practice and Legislation (15 Credits)

- In this course, students will investigate the roles, functions and legislation related to health services and the role and scope of practice of the health professional in those services. They will gain an orientation to the breadth of possible employment opportunities enabling them to make an informed decision regarding their future employment.

Research for Health Care Practice (15 Credits)

- The aim of this course is to introduce students to the principles of research. Students will develop the knowledge and skills of purposeful reading, critique and use of research for professional health care in practice.

Geriatric Care (15 Credits)

- This course will explore the holistic health of the older adult from a psychological, socio-economic, spiritual, political and cultural view. The students will explore the concept of positive aging, life expectancy and quality of life.

Palliative Care (15 Credits)

- Students will investigate the concepts of quality of life and quality of dying, reflecting on legal, ethical, cultural, religious and a personal viewpoint. The students will critically examine the holistic complexities of a life threatening illness on the individual, whanau/family, community and the health professional's role and responsibilities in response.

Work Placement (30 Credits)

- Student will competently apply knowledge to community health to assist in the enhancement of the health of individuals and whanau/families.
- Evaluate how well the holistic health needs of individuals, whanau/families, organisations and communities are met through the provision of health care services.
- Work as a practitioner and advocate with individuals, whanau/families and organisations to develop health management plans that build on the strengths and enhance the resilience of individuals, whanau/families and communities.
- Research, articulate and apply knowledge and skills relevant to ethical and effective community and/or organisational health care practices within a chosen work context.
- Use analytical and inquiry process to further their development as a community and/or organisation health care professional.
