

M A C H I N I S T

Certifiable Red Seal Trade

Salary range:

15.00\$-33.00\$ per hour

Potential Avenues: Aircraft Parts Etcher; Lathe Machining Operator

Main Duties

Precision Machinists use many machine tools, such as lathes, milling machines, grinders, and drill presses, to produce precision metal / non-metal parts. These parts must be made to exact standards, and the machinist uses precision measuring instruments to ensure accuracy and that the parts meet quality guidelines. A machinist reads and interprets blueprints, calculates dimensions and tolerances, lays out their work and marks pieces for machining. Precision machinists often produce small batches or one-of-a-kind items. They use their knowledge of the working properties of metals and their skill with machine tools to plan and carry out the operations needed.
