

When time matters.

Airwing was founded in 2004 and has more than 15 years' experience with business charter in Norway and abroad. We operate a fleet of Learjet 45s with new and modern interior, ready for your disposal.

The quiet luxury of cruising at 47,000 feet at a speed of 860 km/h is a breath-taking experience.

Welcome on board.

We cater to your needs.

We work with professional concierge services all over Europe to ensure that you will experience high quality services throughout your journey.

Our pilots are skilled and well qualified, always striving to offer the highest level of service.

Stress-free & efficient travel.

Airwing takes you wherever you want, whenever you want.

Flying to VIP-terminals ensures less time spent in airports. If your travel plans change, we are standing by.

Highest safety standards.

Safety is always our top priority. We have been operating under a Norwegian air operator certificate (AOC) since 2004. Our pilots have extensive experience from demanding Nordic environments and fly regularly to airports in Europe. All our aircraft are maintained at certified Beechcraft or Bombardier service centers and follow strict manufacturer maintenance programs.

Sustainable aviation with Airwing

When you fly with Airwing you can be assured that our flights are 100% climate-compensated. When offsetting the carbon emissions from your flight, we balance the impact of your journey by actively supporting carbon reduction projects certified by the United Nations and the Gold Standard. On a global scale, we compensate for more CO₂ from the atmosphere than we emit.
