TRACOE cuff pressure monitor sensitive REF 721
Inflation, Deflation and Control of Cuff Pressure with one Hand!

For nursing and care of ventilated patients a regular cuff pressure control is essential. With the help of a handheld manometer this can be fast and easy. The TRACOE cuff pressure monitor sensitive allows one-handed inflation, deflation and control of correct cuff pressure. It can be used by either right/left handed persons.

- Inflation of the cuff and regulation of the pressure with one hand
- The coloured part of the scale indicates the pressure range between 20 and 30 cm H₂O recommended in the literature
- Suitable for right/left handed persons
- One device for inflation, deflation and pressure control
- Always handy - stable yet flexible fastening hook

TRACOE cuff pressure monitor sensitive comes with a connection tube of 1 m which has a male Luer connector at one end and a female at the other end.
