# Introducing Our Earth Kit

A kit for a cleaner birth and a cleaner earth

## For people and planet

Our Earth Kit provides the same level of protection as a standard Clean Birth Kit, but importantly, leaves less of an environmental footprint in the communities where the kits are distributed.

## Biodegradable plastic

The plastic bag and sheet are treated with an organic compound and are biodegradable in microbe rich environments such as landfill. Microbes eat the plastic as food, leaving no micro-plastics behind.

## Carbon offset

In partnership with Carbon Neutral Pty Ltd, 10 native trees are planted in Australia for every 200 Earth Kits packed, helping to regenerate our precious bushland after the recent wildfires.
