# Who We Are

**Belgotex Sport is a committed division specialising in the manufacturing, distribution, construction, installation and development of innovative sports systems. Our world-class sports surfaces are designed to elevate sport and allow South African athletes to train and compete on surfaces recognised and approved by leading international sporting bodies.**

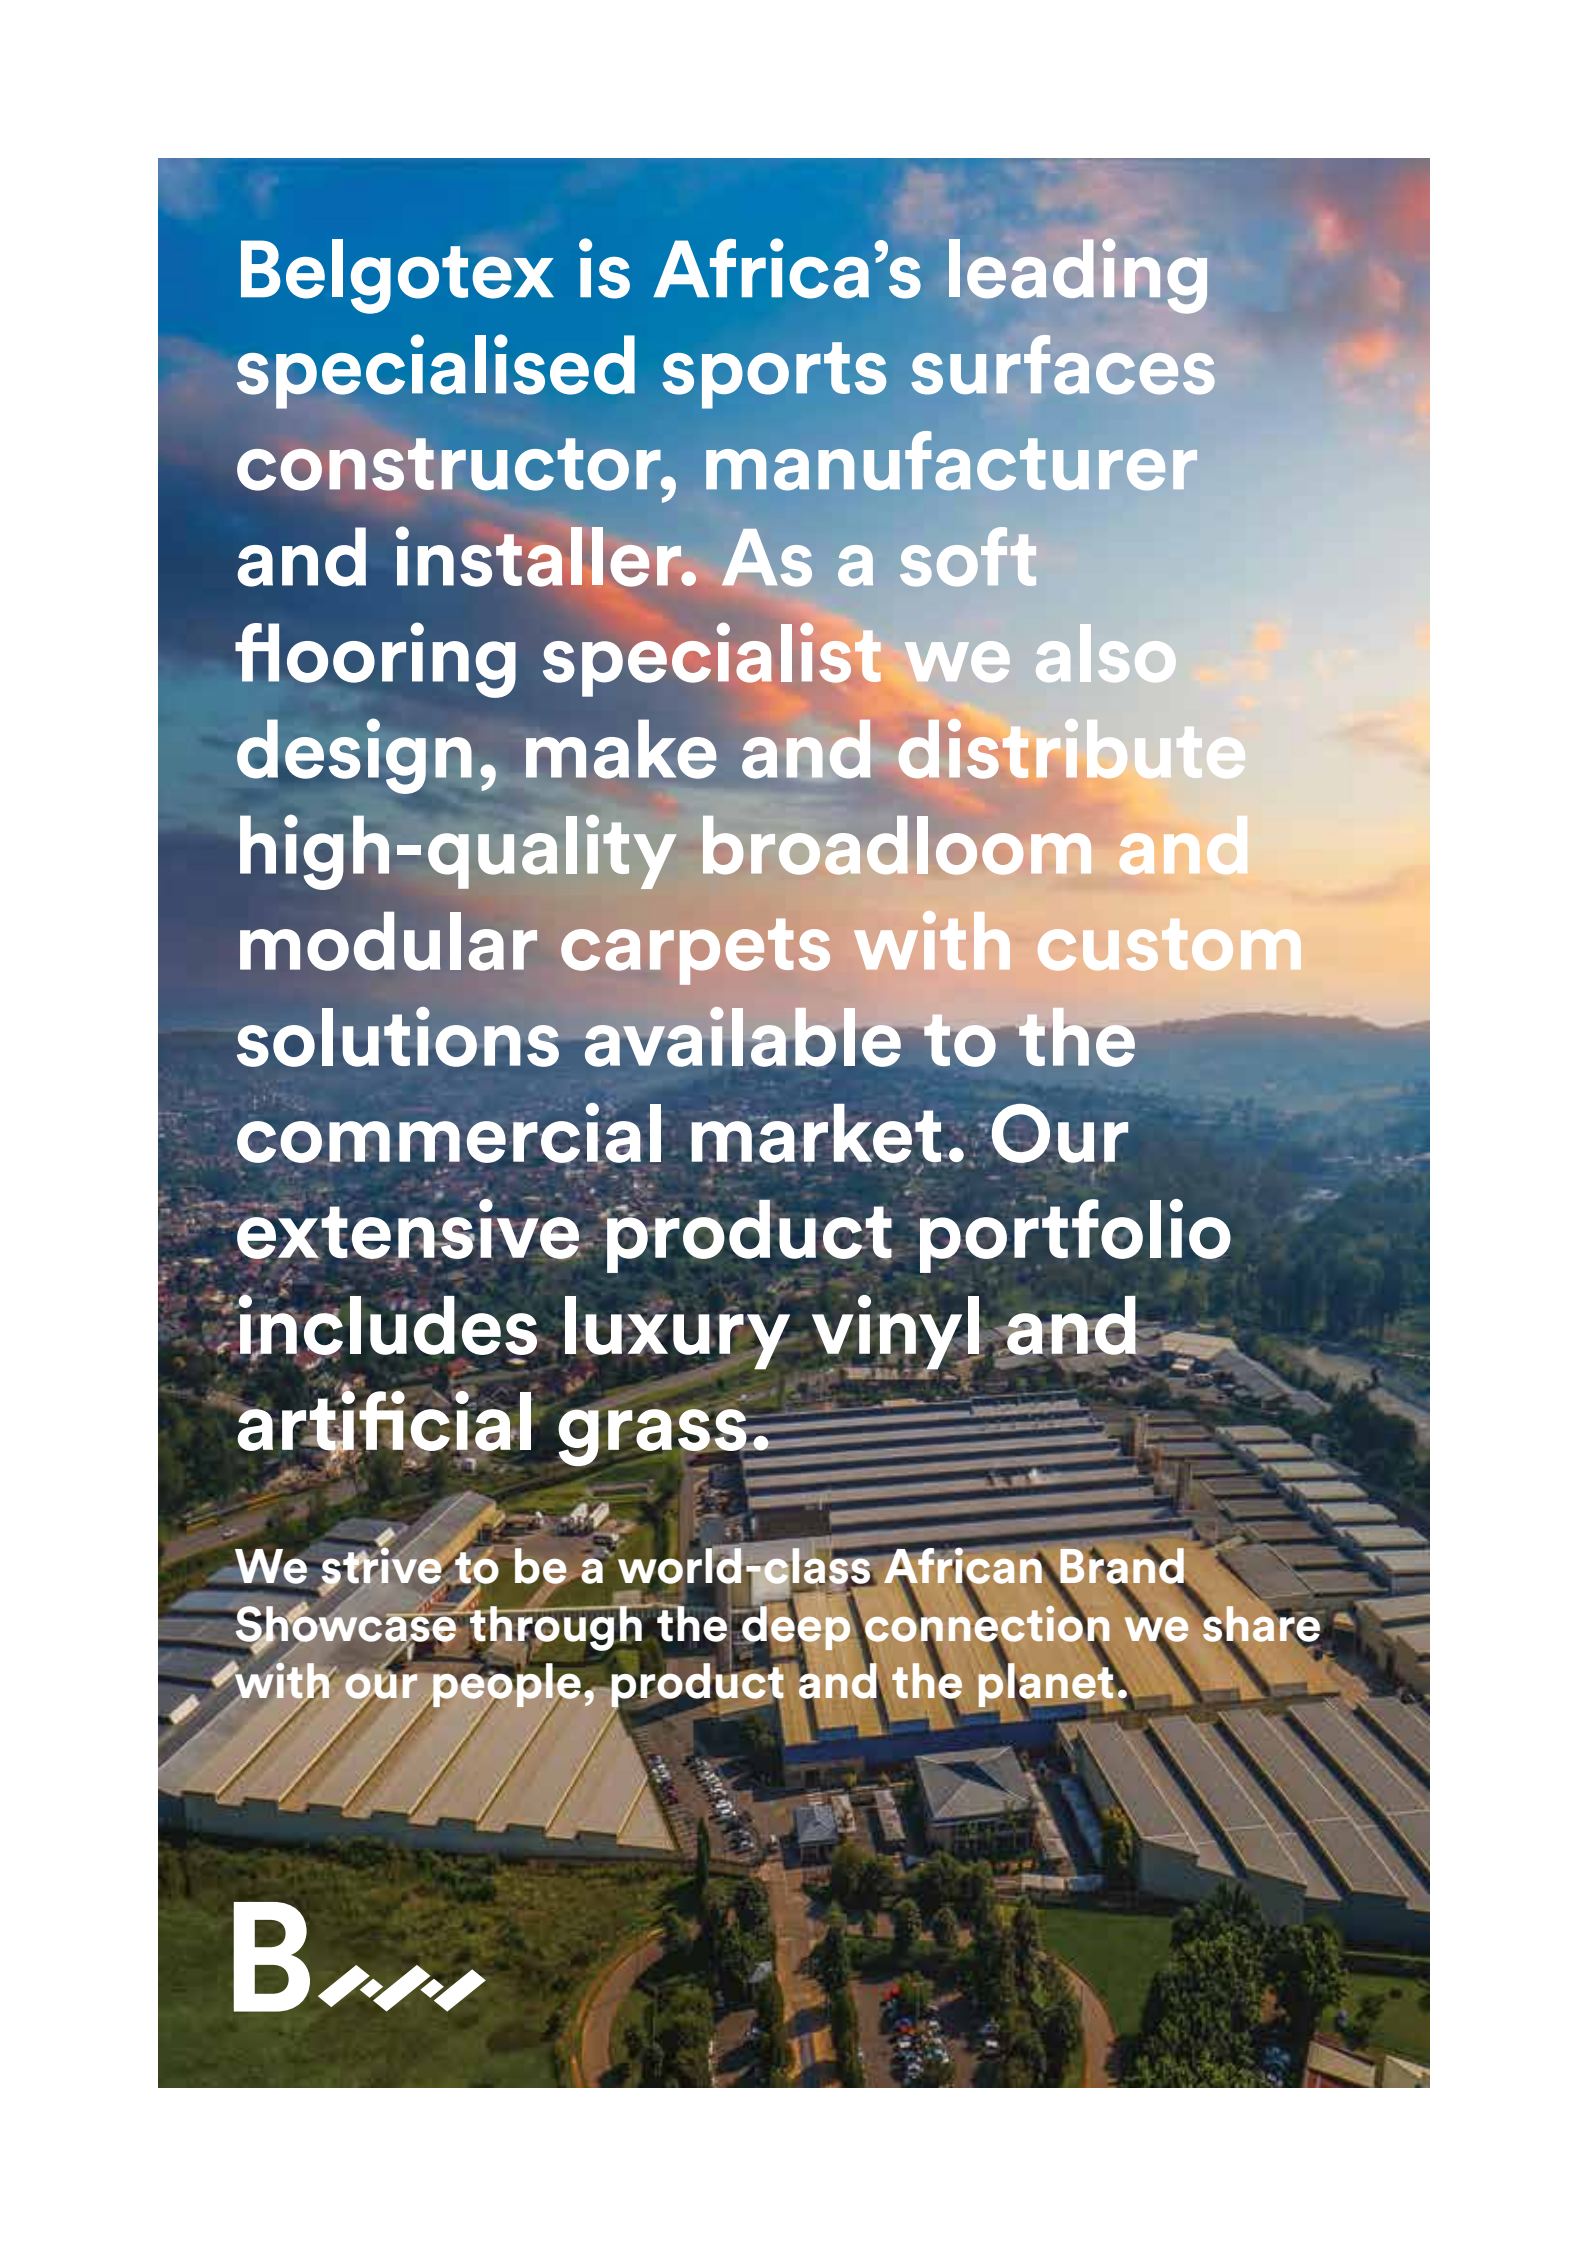

## **Purpose Inspired**

Our purpose, founded upon creativity, communication and collaboration, positions us to nurture meaningful connections with our customers and value partners. In this way, we strive to be better every day, both as a source of inspiration and the knowledge we hold as experienced manufacturers.

## **Made in Africa**

Driven by our vision we focus our efforts on innovation, quality and sustainable product manufacture. As an African company, we have set out to lead by example to provide certified greener alternatives without compromising on product performance and design.

**Belgotex is Africa's leading specialised sports surfaces constructor, manufacturer and installer. As a soft flooring specialist we also design, make and distribute high-quality broadloom and modular carpets with custom solutions available to the commercial market. Our extensive product portfolio includes luxury vinyl and artificial grass.**

**We strive to be a world-class African Brand Showcase through the deep connection we share with our people, product and the planet.**

**Belgotex  
Sport have  
manufactured  
and/or installed  
over 350 projects  
in Southern  
Africa.**

# What We Do

**We offer complete solutions for a variety of sports, including hockey, football, rugby, tennis, multi-functional, indoor flooring and athletics tracks – making us unequalled within the sports surface industry. Being the leading company to locally manufacture synthetic turf at our facility in Pietermaritzburg, we have designed specific products for our environment that meet all the relevant international bodies requirements.**

Belgotex Sport truly is the market leader, with key aspects including experience, worldwide knowledge, unique products, safety and high-quality performance-based systems. Our world-class sports surfaces boast a trophy cabinet filled with local firsts.

- » **First** to tuft synthetic sports turf for football, hockey, rugby and tennis.
- » **First** full-size synthetic football pitch manufactured, supplied and installed to FIFA requirement.
- » **First** to produce 100 hockey pitches in Africa.
- » **First** to have two fields at one venue certified to FIH Global certification.
- » **First** company to own its own construction company.
- » **First** to offer full turnkey project implementation
- » **First** to have produced over 40 full-size football fields.
- » **First** to have produced over 20 synthetic tennis courts.
- » **First** to produce ITF tennis turf.

# **Our Turnkey Services**

**Having established ourselves as the leading specialised sports surface supplier and installer in South Africa, our partnerships and experience allows us to consult, construct, install, test and maintain all types of sport surfaces, providing the best solutions to meet our customer's needs.**

An aerial photograph of a green sports field, possibly a soccer or football pitch, with white boundary lines. The field is surrounded by a dark track or fence. In the background, there are trees and some buildings with blue roofs. A large, semi-transparent technical drawing is overlaid on the right side of the image, showing a detailed site plan with various lines, dimensions, and labels. The text is positioned on the left side of the image, over the field area.

# We consult, construct, install, test and maintain

all types of  
sport surfaces  
facilities.

## Consultation Services

Specialising in artificial grass, indoor, outdoor, athletics tracks and more, we're able to apply our years of expert knowledge and experience, while bringing together various parts of the business, to ensure the best service possible.

## Construction and Installation

Our experienced civil engineers and technical staff perform a pre-inspection of the site that includes a review of dimensions, drainage, soil composition and more, which if not properly executed can lead to problems during construction. From there our expert sport surface installers ensure that every aspect of the installation has been taken care of, ensuring that our quality, sports surfaces meet professional testing requirements.

## Performance Testing

On completion, your pitch can be tested by an accredited testing institute to ensure that it complies with the required standard. This guarantees quality and customer satisfaction.

## Maintenance Services

To ensure that every playing surface retains its high level of performance, Belgotex representatives are on call to train your staff for daily maintenance and can be scheduled for professional maintenance on a long-term basis. This ensures maximum playability and continuous comfort and safety.

## Additional Services

We can provide everything a functional sporting facility requires, such as turf branding, goals, flags, five-a-side boards, lighting, irrigation and water saving solutions.

## Field Rejuvenation

Regular and correct maintenance will ensure the longevity of your turf. However, when an artificial pitch reaches the end of its life cycle we can be consulted to take into account costs, sustainability and whether an entire renovation or only parts of a field need to be replaced, so as to determine the most optimal renovation choice.

# Belgotex Sport

**Belgotex Sport offers a complete solution for your sports construction project from design and planning through to installation and maintenance. As an expert in performance sports surfaces, we have the best knowledge and range of innovative systems and products for your new project. We strive to make the whole process smoother for you by being your expert throughout.**

# **Our Facilities**

**Belgotex Sport world-class sports surface facilities are designed to elevate sport and allow South African athletes to train and compete on surfaces recognised and approved by leading international sporting bodies.**

## **Artificial Turf Facilities**

In 2004, Belgotex Sport joined forces with GreenFields, the leading synthetic sports surface company in the world. Internationally connected and locally driven, our products are made specifically for the harsh South African sun and designed with each sporting code in mind. Belgotex Sport manufactures the artificial turf systems at our big green factory in Pietermaritzburg to the highest international standards, and are FIFA, FIH and World Rugby certified.

# Outdoor Flooring Facilities

Perfect for multi-use areas, the systems offer sound technical performance, allows for excellent and consistent ball bounce, provides good grip and sliding capacity, and is a durable, long-term solution that has been built to withstand tough conditions. Water is quickly and efficiently drained and the easy access application makes it a great permanent or temporary solution, where you may need to install and dismantle and then reinstall again.

**This multi-sport click system tile has been developed for a wide range of sporting activities that includes hockey, tennis, basketball, football, netball and volleyball.**

## Indoor Flooring Facilities

Our indoor flooring systems meet the stringent European and American standards for sports floors, offering an impressive range of high-quality options to suit your budget and sporting needs. Easy to maintain and able to be resurfaced quickly and economically when necessary, the system can be used for anything from a school sports hall to a dance studio and is suited for indoor versions of cricket, hockey, netball, football and volleyball, as well as badminton & basketball, suitable for all levels of amateur and professional play.

# Athletics Track Facilities

Designed for the long run, our environmentally friendly and cost-effective athletic surfaces are extremely durable and weather resistant. Meeting international requirements and technical standards, the surfaces provide safety, comfort and performance. The seamless surfaces can be easily renovated or re-topped with a range of innovative products and systems that fit numerous sports facilities and budgets.

## Hard Court Facilities

We also offer hard courts for sports like tennis, netball and basketball. Our surface options allow for excellent and consistent ball bounce, in combination with good grip and sliding capacity for the athlete, are some characteristics the floor must meet. Because athletes stand on the surface, it needs to feel comfortable with a minimised risk of injury. These courts are durable and hold up well in all climates. Our tennis hard-court systems are ITF approved.

# **Our Applications**

**In addition to our manufacturing capabilities, we also team up with specialist partners to offer the widest range of world-class sport surface systems.**

**Our partnerships with Herculan, GreenFields and Bergo have positioned us to install indoor sports flooring, athletics tracks, artificial turf surfaces, and multi-use click systems. We are also the sole distributors of specialised sports maintenance machines by SMG.**

**GreenFields**

---

# Football

The most popular sport in the world, from grassroots to the professional game, artificial football pitches are becoming more popular and are crucial to year-round playability. Belgotex Sport artificial turf systems are manufactured to meet FIFA specification and constructed to enhance player experience. We offer a turnkey solution from the civils to the accessories that are essential to the functionality of the pitch.

**FIFA®**  
QUALITY

# Kick it

# Rugby

The rugby market's use of artificial turf has experienced an extensive amount of growth over the years, and having recognised this GreenFields has developed an innovative artificial turf system specifically for this market. Our full turnkey service produces and installs fields that are endorsed by World Rugby, which due to the low maintenance costs are fast becoming the preferred surface of choice.

# Try it

# Hockey

Belgotex, in partnership with GreenFields, have experience in the design and construction of professional water-based and sand-dressed artificial turf systems. Installed in line with FIH standards and endorsed by the South African Hockey Association, as the preferred artificial turf supplier our surfaces have been developed to cater for fast-paced developments in the game. We have produced and installed 190 fields to date, and offer our clients a full turnkey service that ensures the delivery of top-class installations.

# Athletics

Providing the South African sporting industry with athletics tracks installed to meet the requirements set out by World Athletics, our partnership with Herculan allows us to offer surfaces at three different price points that are environmentally friendly, seamless, cushioned and with surfaces that are resistant to spikes.

---

# Cricket

The development of artificial grass surfaces has stimulated much interest in the games of hockey, tennis, rugby and football. The improved qualities of artificial grass have been recognised by international governing bodies as FIH, FIFA and World Rugby. We have developed an artificial turf solution for Cricket, suitable for playing pitches and practice nets. Providing an all year round, all weather durable playing surface.

# Drive it

---

# Tennis

An excellent and consistent ball bounce in combination with good grip and sliding capacity for the athlete are some characteristics that the floor must meet. Because the tennis players at this level often stand on the surface, the surface needs to feel comfortable for the player with a minimised risk of injuries. To meet the needs of these sports, Belgotex in conjunction with partners have developed tailor-made sports floors.

A photograph of a tennis player in a white shirt and dark shorts, captured in a dynamic pose as if hitting a backhand shot. The player is on a blue tennis court, and their shadow is cast on the ground. A white line from the court is visible in the lower right corner.

# Lob it

---

# Multi-Use Outdoor

By converting unused or high-maintenance tennis courts or netball fields, these surfaces are given new life and are able to cater for various sports at one facility. In partnership with Belgotex, Bergo's multi-functional interlocking flooring system is manufactured from recycled material with a ventilated and flexible design suitable for various sporting needs. In addition to this, we offer various multi-use artificial turf options for these conversions.

# Play it

---

# Multi-Use Indoor Facilities

Partnering with leading eco-friendly multi-use indoor flooring manufacturer Herculac, Belgotex Sport specialises in the installation of multi-purpose sports halls. Each of these products offers long-lasting high-performance with excellent shock absorption.

# Slam it

# We Tread Softly

Belgotex is proud to receive South Africa's first Custom Industrial 6 Green Star rating. This 6 Star certification recognises 'World Leadership' at our Pietermaritzburg-based factory for our sustainability practices in all aspects of plant and carpet manufacturing operations.

ISO 9001 Certification

**Since the start of our green journey in 1991, Belgotex has constantly pushed the limits for operational efficiency, seeking out ecologically sustainable manufacturing methods and developing eco-friendly products.**

As the first South African flooring manufacturer to earn the coveted Global Green Tag eco-label certification, we have achieved another significant sustainability milestone. This internationally recognised 'Level A' Global Green Tag certification maximises our products' eligibility to achieve 100% of the available credit points across all South African Green Building Council (GBC- SA) rating tools. The stringent assessment process has equipped us to develop holistically and entrench sustainability across our value chain.

Some of our sustainability highlights include: re-purposing harvested rainwater has reduced water consumption by 35-45% since 2015; a R5 million investment into waste management has enabled us to reduce material waste rates to almost zero; and in an active drive to offset CO2 emissions and save energy, we've invested R20 million, to date, into solar power, resource efficiency and plant upgrades.

It's these Eco-Pillars that drive our multi-dimensional long-term operational plans, challenging us to ask more of ourselves and less of the planet in all that we do.
